Field Day 2006

Dear Field Day Participant:

Not long ago, a couple of friends were asking me some Field Day related questions. One of them, a hard-core contester, was relating that propagation had really hurt their score in 2005 and cost them a chance at “winning” Field Day in their category. I think he was a bit surprised at my response, which was “Well, that shouldn’t have been the case. The number of QSOs you make during Field Day is really the least important part of Field Day. **The majority of a successful Field Day happens before the first QSO is ever logged.**”

While some may disagree with the percentage, there can be little disagreement that the many of the most important parts of a successful Field Day happen prior to 1800 UTC on Saturday of the fourth full weekend in June. Some would say that the QSOs are almost anti-climactic. I am not quite sure I would go that far, because the excitement the QSOs generate are an integral part of the event. **But planning and preparation are at the core of this annual event**, just as it was envisioned by F.E. Handy in 1933 with the announcement of the very first Field Day.

Each year thousands of individuals and groups spend months preparing for what to many is the most energetic, exciting 24-hours in the annual amateur radio calendar. The value of this intense preparation is the reason the event provides opportunities for so many bonus points. These bonuses are the reward for the time and talent it takes to test your abilities.

The ARRL continues to promote the public relations and awareness aspects of Field Day. Site visits by state and local officials or representatives of served agencies are more than just a way to earn 100-points. Their value comes from the ability to build the working relationship with these officials – exposing them to the resources we bring to the community.

Last year, the bonus points were expanded to include a greater emphasis on youth involvement. In 2006, this trend is being continued – and expanded – to highlight the importance of the Get-On-The-Air (GOTA) station. **The bonus structure for QSOs made by operators of the GOTA station has been enhanced, hopefully to give a greater incentive to clubs and groups to share the operating excitement with newcomers to the hobby.** Think back to the excitement you felt when you made your first QSO. Hopefully through the expanded GOTA bonus you will be able to help many new participants capture that feeling – and hopefully inspire them to stay active in our hobby.

Field Day 2006 may be June 24-25 but you can start earning your FD Bonus Points today. Make a concerted effort to promote the activity to the officials and media in your community. Dedicate time to getting new people to your site and get them involved and active. The benefits will show in places far more important than your score. It will help the entire amateur community as we continue to adapt to the new challenges of the 21st century.

Good luck and 73!

Dan Henderson, N1ND
ARRL Contest Branch Manager

Field Day 2006 Rules

1. Eligibility: Field Day is open to all amateurs in the areas covered by the ARRL/RAC Field Organizations and countries within IARU Region 2. DX stations residing in other regions may be contacted for credit, but are not eligible to submit entries.

2. Object: To work as many stations as possible on any and all amateur bands (excluding the 60, 30, 17, and 12-meter bands) and in doing so to learn to operate in abnormal situations in less than optimal conditions. A premium is placed on developing skills to meet the challenges of emergency preparedness as well as to acquaint the general public with the capabilities of Amateur Radio.

3. Date and Time Period: Field Day is **always the fourth full weekend of June**, beginning at 1800 UTC Saturday and ending at 2100 UTC Sunday. **Field Day 2006 will be held June 24-25, 2006.**

3.1. Class A and B (see below) stations that do not begin setting up until 1800 UTC on Saturday may operate the entire Field Day period.

3.2. Stations who begin setting up before 1800 UTC Saturday may work only 24 consecutive hours, commencing when on-the-air operations begin.

3.3. No Class A or B station may begin their set-up earlier than 1800 UTC on the Friday preceding the Field Day period.

4. Entry Categories: Field Day entries are classified according to the maximum number of *simultaneously* transmitted signals, followed by a designator indicating the nature of their individual or group participation. A maximum of 20 transmitters are eligible for the purpose of calculating bonus points (2,000 points maximum). However, additional transmitters may be used simultaneously in determining your entry category. Switching and simulcasting devices are prohibited.

4.1. (Class A) Club / non-club portable: Club or a non-club group of three or more persons set up specifically for Field Day. Such stations must be located in places that are not regular station locations and must not use facilities installed for permanent station use, or use any structure installed permanently for Field Day use. A single licensee or trustee for the entry is responsible for the group entry. All equipment (including antennas) must lie within a circle whose diameter does not exceed 300 meters (1000 feet). To be listed as Class A, all contacts must be made with transmitter(s) and receiver(s) operating independent of commercial power mains. Entrants whom for any reason operate a transmitter or receiver from a commercial main for one or more contacts will be listed separately as Class A-Commercial.

4.1.1. Get-On-The-Air (GOTA) Station. Any Class A (or F) entry whose transmitter classification is two or more transmitters may also operate one additional HF station without changing its base entry category, known as the GET-ON-THE-AIR (GOTA) station.

4.1.1.1. This station must operate using a different callsign from the primary Field Day station. The GOTA station must use only one callsign for the duration of the event. The GOTA station uses the same exchange as its parent.

4.1.1.2. The GOTA station may be operated by Novice, Technicians or generally inactive hams under their existing operating privileges, or under the direction of a Control Operator with appropriate privileges, as necessary. Non-licensed persons may participate under the direct supervision of an appropriate control operator. A list of operators and participants must be included on the required summary sheet to ARRL HQ.

4.1.1.3. As per FCC rules, this station must have a valid control operator present if operating beyond the license privileges of the participant using the station.

4.1.1.4. The maximum transmitter output power for the GOTA station shall be 150 watts. If the primary Field Day group is claiming the QRP multiplier level of 5, the maximum transmitter output power of the GOTA station may not exceed 5 watts.

4.1.1.5. A maximum of 500 QSOs made by this station may be claimed for credit by its primary Field Day operation. In addition, bonus points may be earned by this station under rule 7.3.13.

4.1.1.6. The GOTA station may only operate on the Field Day HF Bands. Only one transmitted signal is allowed from the GOTA station at any time.

4.1.1.7. The GOTA station does not affect the additional VHF/UHF station provided for under Field Day Rule 4.1.2 for Class A stations.

4.1.1.8. Participants are reminded that non-licensed participants working under the direction of a valid control operator may only communicate with other W/VE stations or with stations in countries with which the US has entered a third-party agreement.

4.1.1.9. The GOTA station does not qualify as an additional transmitter when determining the number of transmitters eligible for the 100-point emergency power bonus under Rule 7.3.1.

4.1.2. Extra VHF Station: Any Class A entry whose category is two or more transmitters may also operate one additional transmitter if it operates exclusively on any bands or combination of bands above 50 MHz

(VHF/UHF) without changing its basic entry classification. This station does not qualify for a 100-point bonus as an additional transmitter. This station may be operated for the entire Field Day period for the club and all contacts count for QSO credit. It is operated using the primary callsign of the Field Day group.

4.2. (Class A - Battery) Club / non-club portable: Club or non-club group of three or more persons set up specifically for Field Day. All contacts must be made using an output power of 5 Watts or less **and** the power source must be something other than commercial power mains or motor-driven generator (e.g.: batteries, solar cells, water-driven generator). Other provisions are the same for regular Class A. Class AB is eligible for a GOTA station if those requirements are met.

4.3. (Class B) One or two person portable: Club or non-club station set up and operated for Field Day purposes by no more than two persons. Other provisions are the same for Class A except it is not eligible for a GOTA or free VHF station. One and two person Class B entries will be listed separately.

4.4. (Class B - Battery) One or two person portable: Club or non-club station set up and operated by no more than two persons. All contacts must be made using an output power of 5 Watts or less **and** the power source must be something other than commercial mains or motor-driven generator. Other provisions are the same for Class A except it is not eligible for a GOTA or free VHF station.. One and two person Class B - Battery entries will be listed separately.

4.5. (Class C) Mobile: Stations in vehicles capable of operating while in motion and normally operated in this manner. This includes maritime and aeronautical mobile. If the Class C station is being powered from a car battery or alternator, it qualifies for emergency power but does not qualify for the multiplier of 5, as the alternator/battery system constitutes a motor-driven generating system.

4.6. (Class D) Home stations: Stations operating from permanent or licensed station locations using commercial power. Class D stations may only count contacts made with Class A, B, C, E and F Field Day stations.

4.7. (Class E) Home stations - Emergency power: Same as Class D, but using emergency power for transmitters and receivers. Class E may work any class station.

4.8. (Class F) Emergency Operations Centers (EOC): An amateur radio station at an established EOC activated by a club or non-club group. Class F operation must take place at an established EOC site. Stations may utilize equipment and antennas temporarily or permanently installed at the EOC for the event. Entries will be reported according to number of transmitters in simultaneous operation. Eligible for a GOTA and free VHF station at Class 2F and above.

4.8.1. For Field Day purposes, an Emergency Operations Center (EOC) is defined as a facility established by:

- a) a Federal, State, County, City or other Civil Government, agency or administrative entity; or
- b) a Chapter of a national or international served agency (such as Red Cross or Salvation Army) with which your local group has an established operating arrangement.

4.8.2. Planning of a Class F operation must take place in cooperation with the staff of the EOC being activated.

4.8.3. Other provisions not covered are the same as Class A.

4.8.4. A Class F station may claim the emergency power bonus if emergency power is available at the EOC site.

5. Exchange: Stations in ARRL / RAC sections will exchange their Field Day operating Class and ARRL / RAC section. Example: a three transmitter class A station in Connecticut which also has a GOTA station and one VHF station would send "3A CT" on CW or "3 Alpha Connecticut" on Phone. DX stations send operating class and the term DX (i.e. 2A DX).

6. Miscellaneous Rules

6.1. A person may not contact for QSO credit any station from which they also participate.

6.2. A transmitter/receiver/transceiver used to contact one or more Field Day stations may not subsequently be used under any other callsign to participate in Field Day. Family stations are exempt provided the subsequent callsign used is issued to and used by a different family member.

6.3. Phone, CW and Digital (non-CW) modes on a band are considered as separate bands. A station may be worked only once per band under this rule.

6.4. All voice contacts are equivalent.

6.5. All non-CW digital contacts are equivalent.

6.6. Cross-band contacts are not permitted (Satellite QSOs cross-band are exempted).

6.7. The use of more than one transmitter at the same time on a single band-mode is prohibited. Exception: a dedicated GOTA station may operate as prescribed in Rule 4.1.

6.8. No repeater contacts are allowed.

6.9. Batteries may be charged while in use. Except for Class D stations, the batteries must be charged from a power source other than commercial power mains. To claim the power multiplier of five, the batteries must be charged from something other than a motor driven generator or commercial mains.

6.10. All stations for a single entry must be operated under one callsign, except if a dedicated GOTA station is operated as provided under Field Day Rule 4.1.1, it uses a single, separate callsign.

7. Scoring: Scores are based on the total number of QSO points times the power multiplier corresponding to the highest power level under which any contact was made during the Field Day period plus the bonus points.

7.1. QSO Points

- 7.1.1. Phone contacts count one point each.
- 7.1.2. CW contacts count two points each.
- 7.1.3. Digital contacts count two points each.

7.2. Power Multipliers: The power multiplier that applies is determined by the highest power output of any of the transmitters used during the Field Day operation.

- 7.2.1. If all contacts are made using a power of 5 Watts or less **and** if a power source other than commercial mains or motor-driven generator is used (batteries, solar cells, water-driven generator), the power multiplier is 5.
- 7.2.2. If all contacts are made using a power of 5 Watts or less, but the power source is from a commercial main or from a motor-driven generator, the power multiplier is 2.
- 7.2.3. If any or all contacts are made using an output power up to 150 Watts or less, the power multiplier is 2.
- 7.2.4. If any or all contacts are made using an output power greater than 150 Watts, the power multiplier is one.
- 7.2.5. The power multiplier for an entry is determined by the maximum output power used by any transmitter used to complete any contact during the event. (Example: a group has one QRP station running 3 Watts and a second station running 100 Watts, the power multiplier of 2 applies to all contacts made by the entire operation).

7.3. Bonus Points: All stations are eligible for certain bonus points, depending on their entry class. The following bonus points will be added to the score, after the multiplier is applied, to determine the final Field Day score. Bonus points will be applied only when the claim is made on the summary sheet and any proof required accompanies the entry or is received via email or normal mail delivery.

7.3.1. 100% Emergency Power: 100 points per transmitter classification if all contacts are made only using an emergency power source (**maximum 2,000 points.**) **Free transmitters do not count towards the group's total. GOTA station and free VHF Station for Class A and F entries do not qualify for bonus point credit.** All transmitting equipment at the site must operate from a power source completely independent of the commercial power mains to qualify. (Example: a club operating 3 transmitters plus a GOTA station and using 100% emergency power receives 300 bonus points.) **Available to Classes A, B, C, E, and F.**

7.3.2. Media Publicity: 100 bonus points may be earned for attempting to obtain publicity from the local media. A copy of the press release, or a copy of the actual media publicity received (newspaper article, etc) must be submitted to claim the points. **Available to all Classes.**

7.3.3. Public Location: 100 bonus points for physically locating the Field Day operation in a public place (shopping center, park, school campus, etc). The intent is for amateur radio to be on display to the public. **Available to Classes A, B and F.**

7.3.4. Public Information Table: 100 bonus points for a Public Information Table at the Field Day site. The purpose is to make appropriate handouts and information available to the visiting public at the site. A copy of a visitor's log, copies of club handouts or photos is sufficient evidence for claiming this bonus. **Available to Classes A, B and F.**

7.3.5. Message Origination to Section Manager: 100 bonus points for origination of a National Traffic System (NTS) style formal message to the ARRL Section Manager or Section Emergency Coordinator by your group from its site. You should include the club name, number of participants, Field Day location, and number of ARES operators involved with your station. The message must be transmitted during the Field Day period and a fully serviced copy of it must be included in your submission, in standard ARRL NTS format, or no credit will be given. The Section Manager message is separate from the messages handled in Rule 7.3.6. and may not be claimed for bonus points under that rule. **Available to all Classes.**

7.3.6. Message Handling: 10 points for each formal NTS style originated, relayed or received and delivered during the Field Day period, up to a maximum of 100 points (ten messages). Properly serviced copies of each message must be included with the Field Day report. The message to the ARRL SM or SEC under rule 7.3.6. may not be counted in the total of 10 for this bonus. **Available to all Classes.**

7.3.7. Satellite QSO: 100 bonus points for successfully completing at least one QSO via an amateur radio satellite during the Field Day period. Under the "General Rules for All ARRL Contests" (Rule 3.7.2.), the no-repeater QSO stipulation is waived for satellite QSOs. Groups are allowed one dedicated satellite transmitter station without increasing their entry category. Satellite QSOs also count for regular QSO credit. Show them listed separately on the summary sheet as a separate "band." You do not receive an additional bonus for contacting different satellites, though the additional QSOs may be counted for QSO credit. The QSO must be Earth-Satellite-Earth in nature. **Available to Classes A, B, and F.**

7.3.8. Alternate Power: 100 bonus points for Field Day groups making a minimum of five QSOs without using power from commercial mains or a petroleum driven generator. This means an "alternate" energy source of power, such as solar, wind, methane or water. This includes batteries charged by natural means

(not dry cells). The natural power transmitter counts as an additional transmitter. If you do not wish to increase your operating category, you should take one of your other transmitters off the air while the natural power transmitter is in operation. A separate list of natural power QSOs should be submitted with your entry. **Available to Classes A, B, E, and F.**

7.3.9. W1AW Bulletin: 100 bonus points for copying the special Field Day bulletin transmitted by W1AW (or K6KPH) during its operating schedule during the Field Day weekend (listed in this rules announcement). An accurate copy of the message is required to be included in your Field Day submission. (Note: The Field Day bulletin must be copied via amateur radio. It will not be included in Internet bulletins sent out from Headquarters and will not be posted to Internet BBS sites.) **Available to all Classes.**

7.3.10. Non-Traditional Mode Demonstrations: A maximum of 300 bonus points (100 points for each demonstration up to three) for setting up a demonstration of a non-traditional mode of amateur radio communications. This includes modes such as APRS, ATV, and SSTV. **Available to Classes A, B, and F.**

7.3.10.1. This bonus is not available for demonstration of a mode for which regular QSO credit is available. **PSK31 is not eligible as a demonstration bonus as it is now in wide-spread use and is eligible for regular QSO credit.**

7.3.10.2. A complete portable packet system may be included as one of the demonstration modes. This system must include a temporary, portable node and must be completely separate from the existing packet infrastructure of your area. Simply setting up a packet station does not qualify as a demonstration mode.

7.3.10.3. Demonstration modes may not include communications carried outside of the amateur radio spectrum (such as Internet relay).

7.3.10.4. Frequency bands, such as 10 GHz are bands, not modes of communications and do not qualify for the demonstration mode bonus.

7.3.11. Site Visitation by an elected governmental official: A 100-point bonus may be claimed if your Field Day site is visited by an elected government official as the result of an invitation issued by your group. **Available to all Classes.**

7.3.12. Site Visitation by a representative of an agency: A 100-point bonus may be claimed if your Field Day site is visited by a representative of an agency served by ARES in your local community (Red Cross, Salvation Army, local Emergency Management, law enforcement, etc) as the result of an invitation issued by your group. **Available to all Classes.**

7.3.13. GOTA Bonus. Class A and F stations operating a GOTA station may earn the following bonus points:

7.3.13.1. When a GOTA operator successfully completes 50 QSOs, they receive 50 bonus points. Upon reaching 100 QSOs the same operator receives an additional 50 bonus points, for a maximum of 100 Bonus points per GOTA operator. An operator may make more than 100 QSOs but the QSOs over 100 do not qualify for an additional bonus.

7.3.13.1.1. Additional GOTA operators may earn the 50 or 100 GOTA bonus points under this rule, up to the maximum of 500 bonus points. (Remember that there is a 500-QSO limit for the GOTA station. But no single GOTA operator may earn more than 100 of the GOTA bonus points except as provided in 7.3.13.2.

7.3.13.1.2. A GOTA operator must complete all 50 QSOs required before the bonus is earned. There is no "partial credit" for making only a portion of the 50 QSOs.

7.3.13.2. If a GOTA station is supervised full-time by a GOTA Coach, the bonus points earned for each 50 QSOs completed under rule 7.3.13.1 will be doubled.

7.3.13.2.1. The GOTA Coach supervises the operator of the station, doing such things as answering questions and talking them through contacts, but may not make QSOs or perform logging functions.

7.3.13.2.2. To qualify for this bonus, there must be a designated GOTA Coach present and supervising the GOTA station at all times it is being operated.

7.3.14. Web submission. A 50-point bonus may be claimed by a group submitting their Field Day entry via the www.b4h.net/cabforms web site. **Available to all Classes.**

7.3.15. Field Day Youth Participation.

7.3.15.1. A 20-point bonus (maximum of 100) may be earned by any Class A, C, D, E, or F group for each participant age 18 or younger at your Field Day operation that completes at least one QSO.

7.3.15.2. For a 1-person Class B station, a 20-point bonus is earned if the operator is age 18 or younger. For a 2-person Class B station, a 20-point bonus is earned for each operator age 18 or younger (maximum of 40 points.) Keep in mind that Class B is only a 1 or 2 person operation. This bonus does not allow the total number of participants in Class B to exceed 1 or 2.

8. Reporting:

8.1. Entries may be submitted to the ARRL in one of three ways:

8.1.1. Via Field Day Web Submission Applet site at www.b4h.net/cabforms/;

8.1.2. Via email to fieldday@arrl.org; or

8.1.3. Via land postal or delivery service to Field Day Entries, 225 Main St, Newington, CT 06111.

8.2. Entries must be postmarked, emailed or submitted by July 25, 2006. Late entries cannot be accepted.

8.3. A complete Field Day Web Applet Submission site entry consists of:

8.3.1. An official ARRL summary sheet which is completed on the site;

8.3.2. Supporting information must be emailed to fieldday@arrl.org or submitted by land service.

Supporting information must include:

8.3.2.1. An attached list of stations worked by band/mode during the Field Day period (dupe sheet or an alpha/numeric list sorted by band and mode); and

8.3.2.2. Proof of bonus points claimed (copies of visitor logs, press releases, NTS messages handled, photographs, etc).

8.4. A complete non-applet email submission consists of:

8.4.1. An electronic copy of an ARRL summary sheet completely and accurately filled out;

8.4.2. An attached list of stations worked by band/mode during the Field Day period (dupe sheet or an alpha/numeric list sorted by band and mode); and

8.4.3. Proofs of bonus points claimed (copies of visitor logs, press releases, NTS messages handled, photographs, etc).

8.5. A complete land postal or delivery submission consists of:

8.5.1. A complete and accurate ARRL summary sheet;

8.5.2. An accompanying list of stations worked by band/mode during the Field Day period (dupe sheet or an alpha/numeric list sorted by band and mode); and

8.5.3. Proofs of bonus points claimed (copies of visitor logs, press releases, NTS messages handled, photographs, etc).

8.6. Complete station logs are not required for submission. The club should maintain log files for one year in case they are requested by ARRL HQ.

8.7. Cabrillo format log files are not required for Field Day entries. They will be accepted in lieu of the dupe sheets but do not substitute for a summary sheet.

8.8. Digital images of proof of bonus points are acceptable.

8.9. Electronic submissions are considered signed when submitted.

9. Miscellaneous:

9.1. The schedule of bulletin times for W1AW is included in this announcement. While W1AW does not have regular bulletins on weekends, the Field Day message will be sent according to the schedule included with this announcement. The W1AW bulletins will be transmitted on the regular W1AW frequencies listed in *QST*. **The PSK31 bulletin will be transmitted on the W1AW teleprinter frequencies.**

9.1.2. The special Field Day bulletin will be transmitted from station K6KPH on the West Coast as included in the bulletin schedule.

9.2. See "General Rules for All ARRL Contests," "General Rules for All ARRL Contests on Bands Below 30 MHz," and "General Rules for All ARRL Contests on Bands Above 50 MHz" for additional rules (www.arrl.org/contests/forms).

9.3. Remember that the national simplex FM calling frequency of 146.52 MHz should not be used for making Field Day contacts.

9.4. The complete Field Day information package may be obtained by:

9.4.1. Sending a SASE with 4 units of postage to: Field Day Information Package, ARRL, 225 Main St., Newington, CT 06111; or

9.4.2. By downloading from the Contest Branch home page at: www.arrl.org/contests/forms

9.5. For additional Field Day information or questions contact: contests@arrl.org or phone (860) 594-0232.

K6KPH Field Day Bulletin Schedule

SATURDAY	CW	7:30 AM	8:30 AM	9:30 AM	10:30 AM
	CW	5:30 PM	6:30 PM	7:30 PM	8:30 PM
	Teleprinter	6:30 PM	7:30 PM	8:30 PM	9:30 PM
SUNDAYCW		7:30 AM	8:30 AM	9:30 AM	10:30 AM
	Teleprinter	9:30 AM	10:30 AM	11:30 AM	12:30 PM

W1AW will operate on the regularly published frequencies. The special PSK31 bulletin will be transmitted on the regular W1AW frequencies.

CW frequencies are 1.8175, 3.5815, 7.0475, 14.0475, 18.0975, 21.0675, 28.0675 and 147.555 MHz.

Teleprinter frequencies are 3.625, 7.095, 14.095, 18.1025, 21.095, 28.095 and 147.555 MHz (includes PSK31).

Phone frequencies are 1.855, 3.99, 7.29, 14.29, 18.16, 21.39, 28.59 and 147.555 MHz.

The Maritime Radio Historical Society's K6KPH will transmit the "W1AW" Field Day 2006 message for the benefit of West Coast stations on 3.5815, 7.0475, 14.0475, 18.0975 and 21.0675 MHz, CW only. The frequencies for K6KPH Teleprinter (RTTY and FEC AMTOR) will be 7.095 and 14.095 MHz. At the time of publishing this packet, the K6KPH schedules are accurate, but may change. Please check the <http://www.arrl.org/contests/forms/wlaw-fd-sked-2006.html> for any changes or additions.

Field Day

Entries must be postmarked within 30 days of the end of the event and mailed to:

Field Day Entries
ARRL
225 Main St.
Newington, CT 06111 USA

Please write legibly. Make certain you have filled out this form completely and have enclosed any required dupe sheets, photographs and bonus claims.

1. Field Day Call Used _____ GOTA Station Call _____

2. Club or Group name (Class A or F only) _____

3. Number of Participants _____ 4. Number of Transmitters in Simultaneous Operation _____

5. Entry Class: Check only one.

- A. Club or non-club group portable
- B. 1 or 2 person non-club Group portable
- C. Mobile
- D. Home station commercial power
- E. Home station emergency power
- F. EOC Station

6. Power Source: Check all that apply

Generator Commercial mains Battery Solar Other (list) : _____

7. ARRL / RAC Section _____

8. Total CW QSOs _____ x 2 = Total CW QSO points _____

9. Total Digital QSOs _____ x 2 = Total Digital QSO points _____

10. Total Phone QSOs _____ x 1 = Total Phone QSO points _____

12. Power Multiplier (select only one)

- 5 Watts or less and Battery powered = 5
 - 150 Watts or less = 2
 - Over 150 Watts = 1
- (transfer to line 13)

11. Total QSO points _____

13. Power Multiplier _____

14. Claimed Score _____

(line 11 x line 13)
(excluding bonus points)

15. Bonus points claimed: Check each block as appropriate and include required proof of points with your submission. All bonus points will be verified at ARRL HQ and added to your score.

You must complete the Band/Mode and GOTA QSO breakdown box on page 2 of this form.

February 2006 – FD Form

Field Day Entry Submission Instructions:

Please make certain that your required summary sheet is complete with the following fields filled in:

1. **Field Day Call Used:** The callsign used by your club/group/entry. If your group used a GOTA station please list that callsign in the space provided.
2. **Club or Group Name:** If your group entered as a Class A or F entry, please give us the name of the Club or Group.
3. **Number of Participants:** Give the number of persons who participated in your Field Day operation. Include operators, loggers, set-up crew, and visitors.
4. **Number of Transmitters in Simultaneous Operation:** List how many transmitters were active during any 15-minute period of the Field Day event.
5. **Entry Class:** Refer to the Field Day rules for definitions.
6. **Check all power sources used:** If you used more than one source, check all that apply.
7. **Your ARRL / RAC section:** This is usually your state or province, but if you live in one of the 8 US states that have multiple ARRL sections (California, Florida, Massachusetts, New Jersey, New York, Pennsylvania, Texas and Washington) refer to the ARRL section list. DX stations use the term "DX".
8. **Total number of CW QSOs:** In the first blank list the number of raw non-dupe CW QSOs. Multiply the CW QSO total by 2 and enter the CW QSO point total in the second blank. Do not add the power multiplier in this field.
9. **Total number of Digital QSOs:** On the first blank list the number of raw non-dupe Digital QSOs. Multiply the Digital QSO total by 2 and enter the QSO point total in the second blank. Do not add the power multiplier in this field.
10. **Total number of Phone QSOs:** In the first blank list the number of raw non-dupe Phone QSOs. Multiply the Phone QSO total by 1 and enter the Phone QSO point total in the second blank. Do not add the power multiplier in this field.
11. **Total QSO Points:** Add the CW, Digital and Phone QSO points and enter here.
12. **Power Multiplier:** Select the category that corresponds with your power multiplier. **(Remember that to use the multiplier of 5, you must be using 5 watts or less AND running battery or solar power.)**
13. **Enter the power multiplier** from Item 12 onto this line.
14. **Multiply line 11 times line 13 to calculate your claimed score**, exclusive of bonus points.
15. **Bonus Points Claimed:** All categories now qualify for certain bonus points. Check each box for which you are claiming the earned Field Day bonus points. You must submit proof of all bonus points claimed or they will be disallowed. Proof for each may be in the form of photographs, copies of visitor logs, copies of press releases issued or newspaper articles printed, marked log excerpts showing Satellite and Natural power QSOs. A written statement signed by a club or group official will suffice for the Emergency Power, Public Place, Information Booth, and Site Visit bonuses. You must provide serviced copies of any messages claimed for bonus credit. A copy of the WIAW bulletin must be included with the entry submission.

Special notations:

- A. **If the Field Day operation was 100% emergency powered, you receive 100 points for each transmitter up to 20.**
- B. **The Field Day message to the SM or SEC does not also qualify as a 10-point NTS message.**
- C. **Non-traditional modes must only utilize amateur radio. Internet relays, etc do not qualify. Frequency bands (such as 10 GHz) are bands, not modes, and do not qualify for the bonus.**
- D. **If you submitted your entry via the web application at www.b4h.net/cabforms, you may claim an additional 50 bonus points.**
- E. **Youth element – you must fill in information for question 20 page 2 of the summary if you claim this bonus.**
16. **Check this space if you have also submitted the entry via the Web Applet.**
17. **A club officer, authorized club representative or individual must date, and sign the Summary Sheet.** Please provide a mailing address and e-Mail address (if available) in case questions arise with the entry.
18. **You must include a band and mode breakdown of QSOs on the reverse side of the summary sheet form. GOTA station contacts should be indicated on a single line.**
19. **The list of GOTA station operators/participants must be shown and the number of QSOs each made must be listed in order to claim the GOTA bonus. Also you must check the box if you are claiming the double bonus for using a designated GOTA coach/mentor.**
20. **If your group claims the Youth Element bonus, give the number of youth participants (18 years old or younger) who completed a QSO and the total number of youth attendees.**

After completing the Summary Sheet, please enclose it, copies of Dupe Sheets (by band and mode), all proofs of bonus points claimed and mail to:

**Field Day Entry
ARRL
225 Main Street
Newington, CT 06111**

All Field Day entries must be postmarked or e-mailed within 30 days after Field Day or they will be ineligible for inclusion in the Field Day results.

Field Day Overview

Question: What is the most popular amateur radio event in the US and Canada?
Answer: The ARRL Field Day

During the **fourth full weekend in June**, the eyes of the amateur radio community turn towards the annual Field Day operating event. From its beginning back in the 1930's as an event to test the field preparedness and emergency communications abilities of the burgeoning amateur radio community, Field Day has evolved into the largest on-the-air operation during the year. In 2005, FD logs were submitted by a 2,199 clubs, groups and individuals across the US and Canada to the ARRL Contest Branch. These logs showed participation by 33,000 individuals and over 1.27 million QSOs were reported during the brief 24-hours of the event.

Field Day is officially an operating event rather than a contest. The purpose remains today as it did in the beginning: **to demonstrate the communications ability of the amateur radio community in simulated emergency situations.** Groups across the continent use Field Day as a literal "show and tell" exhibition. At sites from the tundra of Alaska to the sandy beaches of Puerto Rico, amateur radio brings together its resources to show officials in government and various agencies what "amateur radio can do."

Many clubs use Field Day as the focus of their annual calendar. Many hams that are not otherwise interested in contesting or DXing find themselves meeting various challenges to help their club run a successful Field Day operation. Officially, Field Day is not a contest. But it is the thrill of the "**non-contest contest**" that brings out the best in thousands of amateurs who under most circumstances choose not to participate in the various sponsored contests.

What makes a good Field Day? Ask that question at any hamfest and you will probably receive a different answer from each person you interview. I would offer a few basic ideas to keep in mind as you contemplate a Field Day operation.

First, and foremost, is **Field Day should be a fun activity.** Field Day serves as one of the biggest introductory "drawing cards" we offer in trying to expand interest in the hobby. A Field Day that is technical in set-up may well produce a good score. But remember that a Field Day that practices the "**KISS**" principle (**Keep It Simple, Silly**) is more likely to attract interest and participation than one which is run like a hard-core contest.

This doesn't mean you don't do the technical planning and preparation to ensure the operation is a good demonstration of what hams can do. It does mean that you should consider having a wide-range of activities and "jobs" which will encourage participation. Yes, 40-meter CW will probably be a great way to rack up points. **But make certain that there are things for the non-CW inclined members of your group to do.** Standing around watching one or two operators make all the contacts is a sure-fire way to kill enthusiasm among your group.

For example, several years ago our local club put up its highest Field Day score ever. We had first-class stations and used outstanding operators on the "prime bands." They put in 18-20 hours of hard core contest-style activity. The next year our club score fell approximately in half. But the number of people who actually made a contact using the club call went from eight to thirty-six. This brings us to the second major point: **a successful Field Day is well planned.**

Planning entails a wide range of things when it comes to Field Day. But they all start at a common sense point: **set realistic goals for your group.** Plan your operation to bring out the best in your club members. If your club is primarily comprised of no-code operators, then set goals which allow their interests to be highlighted. If your club has lots of experience in various modes and operating conditions, plan a more challenging test for yourself. **The success of Field Day is not determined by finishing first in your category or with "bragging rights" over your cross-town rival. Success in Field Day is measured in attaining the goals set for you or your group.**

While many people will be important to your Field Day operation, the key person during the entire experience – from selection of the site to the submission of the score – will be the **Field Day Chairman or Coordinator.** This person needs to be a good organizer with the ability to delegate responsibility. The responsibilities are many: site selection, securing "band captains" for each transmitters, how to best utilize the operating site, helping solicit operators, equipment, computers, generators, assisting in public relations, safety issues, and much more. The Field Day Chairman needs a good working relationship with the club membership and officers. It's also helpful if they have some previous Field Day experience. Many clubs use an experienced Field Day Chairman along with an assistant Chairman who is in "training" to assume the job the following year.

There are two criteria that determine your Transmitter class. First, you must be able to transmit a signal on the total number of band/modes that you claim simultaneously. For example, if you claim 10A, you must be able to transmit 10 different signals at the same time (remember that a band/mode counts as a separate band). Changing the band-switch to another band does not count as a “different signal.” If you are claiming 10 transmitters, you need 10 stations capable of sending a signal at the same time.

As you plan Field Day, don't overlook the wide range of bonus points that are available. Since 2005, all entry classes are eligible for some type of bonus points. Check the rules to see which bonus points you can earn and start earning them!

If you are operating in a category that requires emergency power, you may receive a **100-point per transmitter (up to 20)** bonus if your entire operation is emergency powered. If you use commercial power for some of the equipment, sorry, you don't qualify for the emergency power bonus.

Are you operating in a **public place** (mall parking lot, a local park, in front of the fire department)? Don't forget the 100-point bonus. Add in a table, some general ham radio informational handouts, and some volunteers answering questions for visitors and you have another 100 points for an **Information Booth**.

Sometimes there is confusion as to the bonus for media publicity. Prepare a press release about your event and send it to the various local media outlets (television, radio, and newspapers). At that point you qualify for the **100-point media bonus**. While we hope the press will attend your event, their resources may not allow them to cover it. **The bonus is for the attempt to secure media publicity.**

Educating the state and local government officials and representatives of agencies with which you may work in an emergency is part of the Field Day goal. **You may claim a 100-point bonus if an elected or appointed local or state governmental official visits your site as a direct result of your invitation. A second 100-point bonus may be earned if a representative of one of the agencies which we serve (such as Red Cross or Salvation Army) visits your site as a result of a direct invitation** from your group. Two things are required to earn this bonus: you must **formally invite** officials to visit the operation and one (or more) of them must visit. Maximum bonus is 100 points per category (100 for an elected official and 100 for an agency official – not 100 point per official). **ARRL \ ARES officials do not qualify for this bonus.**

Part of any real emergency will be handling formal traffic for the agencies we serve. Field Day incorporates this into the exercise in two ways. First, 100 points are earned by **originating a message from the club to your ARRL Section Manager or Section Emergency Coordinator**. The message must be originated during the Field Day period. Why not use one of your club's experienced traffic-handlers work with someone just learning how to handle traffic involved in this part of Field Day? (This message does not qualify for the NTS-message bonus provided for in the next paragraph.)

You should also be ready to garner points **for originating, relaying, or receiving and delivering formal NTS style messages** during the Field Day operation. You can gain **up to 100 points (10 points each for 10 messages)** as well as incorporating another segment of your club into the operation. **You can't double dip – so you may not include the ARRL SM/SEC message as one of these messages, since it already receives a separate bonus.**

During any actual wide-scale emergency, W1AW will broadcast situation bulletins during the duration of the event. To allow groups to practice using this source of information, a 100-point bonus is available **for copying the special W1AW Field Day bulletin during the course of the event. You must copy this special bulletin on the air during the Field Day operation.** It won't be sent out as an email or posted to an ARRL web page. It takes some planning on how to accomplish this at your Field Day site, but it is another available bonus category. The W1AW schedule is found in this packet with the rules. **The same official Field Day bulletin will once again be transmitted on the West Coast from K6KPH** (schedule is included with the W1AW schedule.)

Groups for many years have used alternative power sources rather than commercial or petroleum-derivative powered generators to run part of their Field Day operation. To encourage this, an easy **100-point bonus** may be earned **by making at least five QSOs using a “natural power” source.** Solar, wind, water-power, methane or grain alcohol all qualify here. (Sorry, dry cell batteries are a no-no.)

Field Day is a time of experimentation and demonstration for many hams. Two rules encourage groups and individuals to broaden their scope during the weekend. If you **complete at least one QSO via one of the amateur satellites**, you earn a 100-point bonus. **The contact must be directly through the satellite between the two earth bound amateur stations, not relayed through a system that uses a satellite uplink system.** A dedicated satellite station does not count as an additional transmitter towards your group's total. **The total bonus is 100 points – not**

100 points for each satellite that you contact. A QSO with the ISS does not qualify for the bonus since it is not an Earth-to-Earth contact. However, if the astronauts on the ISS participate in Field Day (as they have during the past 5 years) I bet the excitement of that contact energizes your whole Field Day operation.

Many new modes of communication are being introduced into the amateur's "bag of tricks." To encourage this experimentation, you may earn up to **300-bonus points by setting up demonstrations of a "non-traditional" mode of amateur communication. You may earn 100 points each for up to three different demonstration stations.** This would include such things as APRS, ATV or one of the modes that is not covered by the three categories of QSOs – CW, Digital and Phone. Be careful when you choose this mode. **The digital category already includes such things as RTTY and PSK31, so they don't qualify for the bonus. Also you can't do the same demonstration three times for 300-points. It must be three separate demonstration modes.**

If you wish to claim packet for this special bonus credit, you must set-up a completely portable packet system, including a portable node. You may not use existing packet networks to qualify for packet credit under this bonus, and any contacts made do not count for QSO credit. Also remember that frequency bands do not count as modes. For example, demonstrating a CW QSO on 47 GHz does not qualify for the bonus, since CW is not a demonstration mode and 47 GHz is a frequency, not a mode.

If your Field Day group is operating in the **Class A or F** category, and are at least a two-transmitter entry, you have two more ways of adding operating excitement to your event. Groups at **2A or 2F** or higher may add a dedicated **GET ON THE AIR station (GOTA)**. This station may be operated by those holding Novice and Technician-Plus licenses or by generally inactive licensees. Non-licensed individuals may participate in this station under the direct supervision of a properly licensed control operator. **It may be operated on any Field Day HF band or mode, provided it is under the direct supervision of a control operator that has license privileges that includes that band and mode.** The complete guidelines are found in Field Day Rule 4.1.1.

The bonus structure for the GOTA station has changed in 2006. First, the number of QSOs permitted for the GOTA station is now 500. Second, if a GOTA operator completes 50 QSOs, they receive a 50 point bonus for their effort. If the same operator completes 100 QSOs, the bonus goes from 50 to 100 points. The maximum number of GOTA QSOs which an individual operator may make for bonus points is 100. The individual operator may make more than 100 GOTA QSOs but the additional QSOs are not eligible for the bonus. However **other GOTA operators may also earn the 50 or 100 point bonus.** So if you have five different GOTA operators each making 100 QSOs, the group can earn 500 bonus points. **Remember, the maximum number of GOTA QSOs is 500.**

BUT WAIT! If there is an experienced mentor/coach supervising the GOTA station the GOTA bonus points double (50 QSOs would garner 100 bonus points if made under the supervision of the coach.) There are a couple of guidelines. The mentor/coach must be present continuously while the GOTA station is being operated. Also the mentor/coach may advise GOTA operators, but is not allowed to make the QSOs or perform functions such as logging. They can talk the operator through the contacts, but can't make the QSOs for them.

The GOTA station is limited to being an HF station. And as in the past, the GOTA station does not count as an additional transmitter when calculating the class of the station or for determining the per transmitter bonus.

For those in your club who are more VHF/UHF oriented, any group operating as a **Class 2A or higher may also include one dedicated VHF/UHF station.** This will allow those licensees to participate fully on their favorite amateur bands above 50 MHz. **This dedicated VHF/UHF station does not count as an additional transmitter towards your group's total and does not qualify for the 100 points per transmitter bonus.** Your group may operate more than one VHF/UHF station during the event. If you do, the first VHF/UHF transmitter does not count towards your transmitter total.

Getting youth involved in amateur radio is always important. Beginning in 2005, we added a new 100-point maximum bonus known as **the Youth Element bonus. For all Classes except B, you earn 20-points for each person (age 18 or younger) who completes at least one QSO. Class B may earn either a 20 or 40 point bonus if their operators are age 18 or younger.**

After your successful Field Day operation, what happens next? Submitting the required paperwork on time is an absolute must. **Submit your entry** to the ARRL Contest Branch within **30 days of the end of the event.** Your entry begins with a **completely and accurately filled out Summary Sheet** which shows all of the information. Be careful: many of the commercial logging programs provide some basic information on your summary sheet, but leave some important things out. Your best bet is to use an official Summary Sheet. **Make certain you use the most current Summary Sheet from the ARRL, since there are changes that affect scoring. Make certain you**

complete all parts of the Summary Sheet. Without your supplying us complete, accurate information, we can't print the results accurately.

Consider making your submission via the new **ARRL Field Day Web Applet** that is found at www.b4h.net/cabforms/. At this site you can submit your summary sheet information directly to the ARRL and it will show receipt of the information within about 24 hours on the ARRL Web. **Remember that if you use this option you still need to submit your supporting documentation. Also keep in mind that the Cabrillo format does not accommodate Field Day. There it is a 50-point bonus to submit using the Web Applet.**

The logging requirements for Field Day are different from ARRL contests. Instead of standard log files, you are only required to submit a **Dupe Sheet, separated by band and mode.** For Field Day, paper copies of the dupe sheets are acceptable. Keep your logs available, however, in case we need to request you to submit them at a later time for clarification. **You do not have to use the Cabrillo format for Field Day, since it is a log format and only Dupe sheets are required for submission. We do accept Cabrillo log files in lieu of dupe sheets.**

The final part of your submission includes the **various "proofs" of your bonus points claimed.** Some of these are easy. Log sheets noted with the specific QSOs made using natural power or your satellite contacts are sufficient for that bonus. A written statement verifying your location in a public place and a copy of your visitor's log will be fine for claiming those points. Send in a copy of your Press Release, or a copy of any newspaper or media coverage you actually receive. And send in your photographs. **Be creative with your photography.** Sending in a picture of someone in a baseball cap pouring gas into a generator may be proof of use of emergency power, but probably won't be used in the QST write-up. Creative photos of operators, interesting station set-ups, participation by young people and such are more likely to catch the eyes of **QST** editors.

An excellent way to share your group's Field Day story is via the Online Soapbox on the ARRL Web. Log on to www.arrl.org/contests/soapbox and select Field Day. From that site, you may upload a narrative of your group's Field Day operation as well as photographs. Once these are proofed at ARRL Headquarters, they are posted to the web for thousands to share.

The rules require a couple of specific proofs for some of the bonus points. You need to submit a copy of the fully serviced National Traffic System message sent to your Section Manager or Section Emergency Coordinator as well as any messages relayed from your site. You also need to submit a complete copy of the special Field Day message in your submission. If you submit electronically you should send these proofs as attachments to your email submission.

A couple of hints that might help you make your event even more successful might come in handy. Remember: that while one of the purposes of the event is to have fun, you need to practice **safety** as well. **Having a safety officer for the site is a good idea.** Make certain antennas are safely away from power lines. Generators should be grounded properly and operated carefully. Guy wires for temporary structures or towers need to be well marked. The safety officer needs to work closely with the Field Day Chairman to ensure everyone has a safe, as well as fun time.

Make certain everyone is familiar with the Field Day rules. Some people show up and mean well, but their activities on behalf of the club may not be within the spirit of the rules. The complete Field Day rules appear at the Contest Department's Web Page online at: www.arrl.org/contests. From that page, you can **download the complete Field Day packet.** This packet includes copies of the official summary sheet, several other useful forms, as well as some simple information material on several aspects of Field Day. You can also receive this packet by sending an SASE with at least 4 units of postage to: Field Day Packet, ARRL, 225 Main St, Newington, CT 06111.

How you organize your group for Field Day will depend on the numbers of participants and size of the operation you plan. **One helpful hint is to appoint an individual to head up each station /mode/ band.** These "band captains" should be responsible for planning their individual station, working in conjunction with the Field Day Chairman and the other stations planned. Band captains shouldn't be expected to do it all so make certain each has plenty of help for set-up, operating and taking down the site.

If you have questions about Field Day after reviewing the rules and packet, drop an email to contests@arrl.org or phone (860) 594-0295 and someone in the Contest Branch will be happy to help you. Field Day is the most popular amateur radio operating event in the US and Canada. Please contact the ARRL Contest Branch if we can assist you in some way to help ensure your Field Day operation this year is the best ever!

Field Day Frequently Asked Questions:

Q. I am going to operate my transmitter at the club's Field Day using solar panels and 2 watts. The rest of the club will be using 100 watts and power from the generator. May we score my QSOs with the bonus multiplier of 5 and combine it with the rest of the group's multiplier of 2?

A. The Power multiplier is determined by the **highest power output of any transmitter in use** at the station. To claim the multiplier of 5, ALL stations must be running QRP and must be running off of a power source other than the commercial mains or a generator. The power multiplier for all QSOs from the setup described is 2.

Q. Can I help with the group Field Day effort during the day and still operate from home overnight?

A. Yes, but you may not make a contact for QSO credit with any Field Day group or station from which you participate. For example, if you operate one of the W1AW station transmitters during Field Day, you may not work W1AW from home for QSO credit.

Q. We have some great Field Day photos we would like published in QST. How do we submit them?

A. You may submit photos several ways. Digital photos may be sent via email to contests@arrl.org (be sure to include captions that identify the activity and all identifiable persons in the picture). Regular photos may be sent to Field Day, ARRL, 225 Main St., Newington CT 06111 along with your Field Day entry. Again, please make sure to include captions and that your photos are as high resolution as possible.

We receive thousands of pictures every year for Field Day, and space in QST is very limited. We cannot guarantee the publication of any specific photo submission. However you are encouraged to post them to the ARRL Online Soapbox at www.arrl.org/contests/soapbox where they can be viewed and shared by the thousands of visitors to the site.

Q. We sent a press release to the local TV station, but they didn't send a crew out to cover our operation. May we still claim the Media bonus?

A. Yes. In order to claim the media bonus, you must only attempt to obtain publicity.

Q. PSK31 is a new mode. May we do a demonstration of it and claim a 100-point bonus for demonstrating a non-traditional mode? What about if I demonstrate my transverter for 10 GHz?

A. You may not claim a demonstration bonus for a mode for which you can earn regular QSO credit. Since PSK31 counts for Digital QSOs credit, it may not be a demonstration bonus. 10 GHz is a frequency band, not a mode so it does not qualify for a non-traditional mode bonus.

Q. I like to use packet radio. Can we demonstrate packet and claim a bonus?

A. Packet may be claimed as a demonstration mode **only** if you set up a complete, portable packet network. This must include a temporary, portable node that is independent of the existing packet infrastructure in your area. Simply setting up a packet terminal and operating back to the established packet network in your area does not meet the requirement.

Q. How do we indicate our bonus points in the Cabrillo log file?

A. **Cabrillo log files are not required for Field Day.** In fact, the Cabrillo file structure is not set up to accommodate Field Day. You are not required to send complete log files for Field Day QSOs to ARRL. You are required to send a list of stations you worked during the event, in alphanumeric order sorted by band and mode. **All Field Day entries need to include a current official Summary Sheet (or reasonable facsimile) that is completely and correctly filled out. Cabrillo files are accepted in lieu of the dupe sheets but you must still submit a Summary Sheet to have a valid entry.**

Q. My club mailed its Field Day entry last week. Our president phoned this morning to see if it had arrived but you couldn't tell him. What's going on?

A. Since the Cabrillo format cannot accommodate Field Day, it is not possible to have the entries read by a robot and an automated Logs Received list posted. However, if your entry was submitted via the Field Day Web Submission Applet at www.b4h.net/cabforms/, it will appear on the Logs Received list shortly after it is cleared by the web applet.

If you submitted as a regular e-log or paper submission, it takes a considerable amount of time to open and process these entries into the master database (they are all done manually.) All incoming mail is opened in the mailroom before being sent to the Contest Branch. Because of the large volume of mail at that time of year, and because of other duties in the department, it takes several weeks for mail to be entered into the database after it is received. We cannot locate a specific entry without searching through hundreds of entries waiting to be processed by hand.

Once all e-log and paper entries are processed, they will be added to the list of Logs Received via the web applet and posted on the ARRL Contest Web pages at www.arrl.org/contests. Many groups include a self-addressed stamped postcard with their entry, asking us to please return it when their entry arrives. Others will send their entry using one of the US Postal Service's options for a receipt upon delivery. If you do submit via email, please remember that you must still include a reasonable facsimile of the required Summary Sheet completely filled out. You may also attach the various required dupe sheets and proofs of bonus point as attachments (JPG, ASCII text files, Word documents, etc) to the email. **Send all of the entry attached to a single message, if you are sending via e-mail.**

Q. How do I determine my ARRL section?

A. For most states, there is only one ARRL section that encompasses the entire state. Eight states – California, Washington, Texas, Florida, New Jersey, Pennsylvania, New York and Massachusetts – have multiple ARRL sections. A list of the sections is found monthly in QST. It is also found on-line at <http://www.arri.org/contests/>

Q. I will be driving on vacation during Field Day and going through several sections. What section do I give in my exchange? When I change sections, do I count as a new station and am I able to re-work people?

A. Give the section in which you are currently located. You may work a station only once per band/mode, regardless if you change sections while mobile.

Q. I will be using battery power but running my station at 100 watts. What is my power multiplier?

Q. I will be running QRP using my emergency generator at home. What is my power multiplier?

A. To claim the power multiplier of 5, you must be operating QRP (5 watts or less) **AND** running on a power source other than commercial mains or a motor-driven generator. **In both of these cases, the power multiplier is 2.**

Q. What equipment at our Field Day site must be operated off of the emergency power in order to claim the 100-point per transmitter bonus?

A. You must operate all transmitting and receiving equipment from emergency power. If you use a computer to control or operate the radio, it also must use emergency power. If the computer is used only for logging and is not keying the transmitter, it does not need to be emergency powered.

Q. I am going to be a home station using emergency power. What bonus points may I claim?

A. All entry classes now are able to claim certain bonus points. Refer to the complete Field Day rules, Rule 7.3, for specifics.

Q. We will be running a generator to power our stations, but will be using commercial power for the lights, coffee pot, etc. What power source should we check?

A. Only check the power source which is used to operate the transmitting/receiving equipment.

Q. My buddy and I will be going to the campground with our families for Field Day. Only he and I will be setting up the station and operating. Are we Class A or B?

Q. I will be camping with my family during Field Day. My 3 kids will help me set up the antennas and station, but will be busy doing other things while I operate. Am I still Class B?

A. A Class B station may only have *1 or 2 persons involved in its set-up or operation*. In instance one, the entry class is B. In instance two, the entry class is A.

Q. How do we sign forms that we send in via email?

A. Electronic submissions are considered signed when sent.

Q. What kind of “proofs of bonus points” do we need to send?

A. It depends on which bonuses you claim. For emergency power, public location, public information table, satellite QSO, alternate power, and non-traditional modes, a signed statement from a club official attesting to the fact is sufficient. Copies of the NTS message to the Section Manager, any NTS messages sent or received, the W1AW message, and any press releases (or copies of the story if your local media actually runs a story) must be included. If an official from a served agency and government official visits the site, a copy of your invitation as well as a statement that they did visit the site (signed by a club official) is sufficient.

Q. What about the 60-meter band? May we use it in Field Day?

A. Because of the limited scope of the 60-meter band, it is not included in bands eligible for Field Day use.

Q. Can we claim the GOTA station for a 100-point emergency power bonus? What about the free VHF station?

A. Neither the GOTA station or the free VHF station are eligible for the 100-point emergency power bonus.

Q. I sent the Section Manager a participation message. Do I also get 10-points for sending it under the NTS bonus?

Sorry, you can't “double dip.” The SM participation message is not eligible for the NTS bonus.

Class F Station FAQs

Q. Why an EOC category for Field Day?

A. Class F encourages ARES, RACES or local radio club groups to develop working relationships with their EOC or to practice an existing emergency plan.

Q. What qualifies as an EOC?

A. To qualify it must be either a) a Federal, State, County, City or other Civil Government agency or administrative entity; or, b) a chapter of a national or international served agency (such as American Red Cross or Salvation Army) with which your local group has an established operating arrangement.

Q. Who may Class F stations contact?

A. Class F stations may contact any station participating in ARRL Field Day.

Q. Our county EOC is wired for emergency power but it will not be used during Field Day. May we still claim the emergency power bonus for each transmitter?

A. We understand that it is costly for an EOC to run their emergency power generators for an extended period of time to accommodate a Field Day operation. In order to claim the bonus a Class F station must provide a statement from an EOC official showing that a test of the emergency generating equipment was done during the Field Day period. If such documentation is provided, the Class F station may claim the emergency power bonus.

Q. Is there a limit on the number of transmitters for a Class F operation?

A. Stations may use as many transmitters as they desire, within the other rules of the event. Keep in mind that you must coordinate your operation with the EOC staff so as not to interfere with their daily functions.

Q. Our group doesn't have a working relationship with the local EOC. May we simply set up in the parking lot of their building and enter the category?

A. In order to enter as Class F, you must have actively planned and coordinated the operation with the representatives of the EOC being activated.

Q. Our EOC is not accessible by the general public. How may we earn the bonus points for setting up in a public place and the information booth?

A. Consider setting up your non-traditional demonstration modes in an area of the EOC with public access. You could incorporate your information table into this set-up and claim the bonus points. You may also set up your information booth in an area away from a secured EOC provided it is in an area with public visibility.

Q. May Class F stations have a GOTA station and the additional VHF station?

A. Unless otherwise stated, all provisions of Class A stations apply to the Class F operation. If they are operating at least as 2F, Class F stations could use both additional stations.

Q. Because of space considerations, our established Emergency Operations plan with the County officials is structured such that we utilize manned VHF/UHF links between the EOC with an off-site HF operating location. Do we qualify as an EOC station?

A. If the operating site at the EOC being served has an established HF presence, the Class F station should be operational from the EOC. If your Emergency Operating plan relies on linking the EOC to a principle off-site operation, the off-site location may operate as a Class F station, provided the VHF/UHF link with the EOC is established and maintained during the entire Field Day operation.

Q. My company has an EOC that we use when there is an emergency. Does this allow us to operate there and qualify as Class F?

A. Generally, this answer is No. Since amateur radio can't be used to facilitate business communications, the EOC of private companies do not qualify as Class F stations. In some rare circumstances, such as the local utility company that is a direct part of the overall local/town/city/county emergency operating plan, a non-governmental EOC might qualify. But an EOC whose purpose is to support the keeping a company in business during an emergency does not qualify for Class F.

GOTA Station FAQs

Q. What is the GOTA station?

A. It is an opportunity for Novice, Technician, Technician Plus licensees, other generally inactive licensees, and non-licensed persons to experience first-hand the fun of amateur radio by allowing them to **GET ON THE AIR**.

Q. How many GOTA stations may a club have on the air?

A. Only one GOTA station may be used by a club at any given time.

Q. What are the bands for the GOTA station?

A. The GOTA station may operate on **any amateur HF band on which Field Day operation is permitted**.

Q. What modes and frequencies may the GOTA station use?

A. The modes and frequencies are determined by the license class of the control operator of the GOTA station. There must be a control operator permitted to use the frequencies and modes desired in direct control of the GOTA station any time it is transmitting.

Q. What callsign does the GOTA station use?

A. The GOTA station uses a callsign different from the call being used by the group's main Field Day operation. The GOTA station also uses a single callsign for the duration of Field Day. Remember that you must have permission of the holder of the callsign in order to use it for the GOTA station. Also remember the rules of station ID. A two-by-three call issued to a Technician licensee may be used, but if the call is being used outside of the privileges of the licensee, it must also include the callsign of the control operator (WA4QQN/N1ND for example).

Q. What exchange does the GOTA station give?

A. GOTA stations use the same exchange as its "parent" station.

Q. Who may the GOTA station contact?

A. The GOTA station may contact any other amateur radio station, with a couple of exceptions. The GOTA station may not work its "parent" Field Day station. It may not contact any station operated by a person who was involved with their group's Field Day operation. Remember that if a DX station is involved, the FCC rules involving Third Party participation apply.

Q. What is considered a generally inactive licensee?

A. The GOTA station is not for everyone. The generally inactive licensee provisions pertain to someone who holds a General or higher class license but has been inactive. The intent and the spirit of this station is to provide an opportunity for persons to gain valuable on-the-air experience. This is not a station that a club "ringer" operates in order to rack up points. ***The list of operators of this station must be submitted with the Field Day entry.*** A couple of guidelines to keep in mind when allowing persons to operate the GOTA station:

- 1) Any licensee who has never made HF contacts would be considered inactive.
- 2) Someone who has made no QSOs in the last two years would be considered inactive.
- 3) A person who operated the GOTA station as a generally inactive licensee last year would not be eligible to operate the GOTA station in the following Field Day.

In order to claim the GOTA bonus, the club/group must provide a list of operators and the number of QSOs each operator makes at the GOTA station. ***Clubs should use their judgement in determining the operators of the GOTA station.***

Q. May someone operate both the GOTA and the main Field Day stations?

A. It is permissible for someone to operate both GOTA and the main stations. However, remember that to use the GOTA station, you must meet the requirements of license class, be generally inactive, or a non-licensed person. It is not permissible for a seasoned operator to operate the GOTA station.

Q. May a non-licensed person operate the GOTA station?

A. A non-licensed person may ***participate*** in the GOTA station by speaking into the microphone, sending CW, or making digital contacts but may do so only under the direct supervision of a properly licensed control operator.

Q. I am an active Novice licensee. May I operate the GOTA station?

A. Yes. The GOTA station may be operated by any Novice or Technician licensee, under the terms of their license privileges, or under the supervision of a control operator.

Q. How do I calculate the GOTA bonus points?

A: Please refer to the separate GOTA Scoring FAQ in this packet.

GOTA Scoring FAQs

In order to encourage Class A and F stations to make concerted efforts to have a GOTA station and to maximize the number of participants at the GOTA station, there have been changes in the GOTA Bonus Point structure.

In addition to the regular QSO points earned the individual operator of a GOTA station can earn 50 bonus points when they complete 50 QSOs. They earn an additional 50 bonus points when they reach the 100-QSO level. The operator may make additional contacts for credit beyond the 100-QSO level, but only the first 100 qualify for the bonus points. Additional operators may earn the 50 and 100-point bonuses for a GOTA station, up to the maximum of 500 QSOs allowed for the GOTA station. If the GOTA station is supervised full-time by a designated GOTA Coach, the earned bonus points doubles (the 50 points for 50 QSOs becomes 100 points, 100 points for 100 QSOs become 200 points, etc).

Q: How many QSOs may be completed by operators of the GOTA station?

A: 500.

Q: How do you earn GOTA bonus points?

A: The operator of the GOTA station earns a 50-point bonus for completing 50-QSOs at the GOTA station. In addition, they earn an additional 50-point bonus when they complete 100 GOTA QSOs. These QSOs do not have to be made all at once – they can be a cumulative total for operation at the GOTA station during Field Day by the operator.

Q. May an operator make more than 100 QSOs at the GOTA station?

A: Yes, but they only receive bonus points for the first 50 and 100 QSOs. Any additional QSOs beyond the 100 do count towards the 500-QSO limit for the entire GOTA operator. You still receive the regular QSO credit for QSOs over 100 made by an operator, but the maximum bonus points for any individual operator is 100 (excluding the double bonus described below).

Q: I completed 85 QSOs at the GOTA station. How many bonus points do I receive?

A: Since you completed at least 50, you receive a 50-point bonus.

Q: I completed 85 QSOs at the GOTA station and my friend completed 65. That's a total of 150 QSOs. Can we combine our efforts for 150 bonus points?

A: The bonus points are given for the effort of each individual operator. You would both each earn 50 bonus points for completing the 50 QSO level, but you can not "pool" QSOs among various operators to reach another bonus.

Q: How do I earn the "GOTA Double Bonus"?

A: In order for the bonus points for the GOTA station to be doubled, there must be a designated GOTA "Coach" or "Mentor" working with the GOTA station whenever it is in operation.

Q: Our designated GOTA Coach will be operating the 15-meter CW station in the next tent, with the instructions that if we need them we know where to go get them. Does this affect our double bonus?

A: The GOTA Coach must be physically at the GOTA operating position and monitoring/teaching the GOTA operators any time it is being used. The double bonus is to compensate for the GOTA Coach not being at other stations operating, so they should not be involved in any other station while the GOTA station is in use.

Q: Some of our GOTA operators are comfortable making QSOs without a Coach while others need the Coach. How does this affect the scoring of the GOTA bonus points?

A: In order to qualify for the double GOTA Bonus, the GOTA Coach must be present at any time the GOTA station is being operated. If the double bonus does not apply to all QSOs for the GOTA station, it can not be applied to any.

Q: Our GOTA Coach wants to go home to sleep. Does this mean we lose the double bonus?

A: You don't have to have only one person serving as the GOTA Coach. Several experienced operators may serve as GOTA Coaches. As long as at least one of them is present while the GOTA station is operating, you can still claim the double bonus.

Q: How do we claim the GOTA Bonus?

A: First, mark the appropriate area in Item 15 on the Summary Sheet. Then in Item 19 on the Summary Sheet, you must list the name and/or callsign of each operator of the GOTA station for which you are claiming the bonus, the number of QSOs completed by that operator, and the number of bonus points you are claiming earned by that operator. If you do not complete Item 19, the GOTA bonus may be disallowed.

Field Day Tips for 30 MHz and Above

By Steve Ford, WB8IMY, Editor, QST

Updated January 2006

When most hams think of Field Day, they automatically envision a stampede of activity on the HF bands. While this may be true, there is a potential gold mine of contact points on the bands above 30 MHz.

CW/SSB

You will find the greatest amount of CW and SSB activity on the 6 and 2-meter bands. On 6 meters, CW/SSB stations tend to gather around 50.125 MHz and above. The popular hangout on 2 meters is centered on 144.200 MHz.

If propagation is especially good, 6 meters can burst wide open and yield contacts spanning several thousand miles. During Field Day weekend, you can usually count on **average conditions with a range of up to 200 miles on 2 meters and 400 to 500 miles on the 6-meter band**. However, be on the lookout for **propagation enhancements** such as sporadic E. During a good sporadic E opening, you'll work stations 1500 miles away, if not farther. You'll also find some CW and SSB activity on the higher bands such as 222 and 420 MHz. If you are strapped for equipment, however, concentrate your resources on 6 and 2 meters. For CW/SSB operating, beam antennas are your best bet—the more elements the better. (Make sure your antennas are horizontally polarized (the antenna elements must be parallel to the ground.) Horizontal polarization is the CW/SSB custom. The penalty for using the wrong polarization is a tremendous loss of received signal strength.

FM

For Field Day operating, FM is probably the easiest VHF mode to implement. You'll have little trouble finding FM rigs to use; even a hand-held transceiver can make a fine Field Day rig. **FM doesn't have the range of CW or SSB**, but it is the most popular communications mode on the VHF and UHF bands. You'll find the greatest amount of FM simplex activity on the 2-meter band, although 6 meter FM may be worth a try as well. **Remember that Field Day rules prohibit the use of repeaters**. This means you'll have to hunt for contacts on the recognized simplex frequencies.

Unlike CW and SSB, most FM operators use vertically polarized antennas. To maximize your signal coverage, you'll want to use vertical polarization, too. A small beam antenna mounted in the vertical-polarity position (elements perpendicular to the ground) is one suggestion. An alternative is a simple omni-directional antenna such as a ground plane. Since most of your contacts will be local, an omni-directional antenna may be nearly as effective as a beam.

SATELLITES

Satellites are a blast on Field Day! Of course, to use a satellite you have to know when it will be passing across your local sky. One easy way to obtain pass predictions is on the AMSAT Web site at www.amsat.org/amsat-new/tools/predict/. Just print the predictions for the satellites you intend to use.

FM Birds

Do you have a dual band VHF/UHF FM rig that can receive below 437 MHz? Try OSCARs 27 and 51—the FM repeater satellites. Just use the frequency table below to program the radio's memories so that you can compensate for Doppler shifting by simply changing memory channels.

Satellite Time	AO-27		AO-51	
	Transmit	Receive	Transmit	Receive
AOS (start)	145.860	436.805	145.930	435.310
AOS+3 Minutes	145.855	436.800	145.925	435.305
Zenith (maximum)	145.850	436.795	145.920	435.300
Zenith+1 Minute	145.845	436.790	145.915	435.295
LOS (end)	145.840	436.785	145.910	435.290

Notes:

--AO-27 is only available for daylight passes.

--AO-51 occasionally operates on other bands and modes. Check the schedule page on the Web at www.amsat.org/amsat-new/echo/ControlTeam.php **before you leave for Field Day!**

SSB/CW Birds

If you can transmit and receive SSB on 2 meters and 70 cm, you have two satellites to try...

VUSat-OSCAR 52

This is an excellent SSB/CW bird and you can work it with a fairly minimal setup. The tricky aspect is that OSCAR 52 has an *inverting transponder*. If you transmit LSB, the satellite repeats as USB. If you transmit at the high end of the passband (see below), OSCAR 52 will repeat your signal at the low end of the passband.

Uplink Passband
435.220 – 435.280 MHz

Downlink Passband
145.870 – 145.970 MHz

Fuji-OSCAR 29

This satellite isn't particularly active, even on Field Day, but it has excellent range and solid signals. Like OSCAR 52, it also uses an inverting transponder.

Uplink Passband
145.900 -- 146.000 MHz

Downlink Passband
435.800 -- 435.900 MHz

Some Final Considerations

When it comes to VHF/UHF operating, antenna height is everything (the only exception is satellite operation). To make the most of your VHF/UHF capability, you'll need to mount your antennas on portable supports or select a hill or mountain for your Field Day site. Feed line loss is substantial at VHF and UHF, so use the best coaxial cable you can find. If you exploit the VHF/UHF bands to their full potential, you'll be surprised at how many points you'll add to your score. And if the HF bands are dead, VHF and UHF may save the day!

Who's in Control of Your Field Day Station?

By John Hennessee, N1KB, ARRL Regulatory Information Specialist

Before Field Day, ARRL is always answering questions about FCC rules as they apply to Field Day. Of course, every station must have a control operator (97.103). On Field Day, you often operate using someone else's station. You, the licensee, are responsible for all transmissions from your station. During Field Day, many amateurs often use a single call sign, so the station licensee must designate a control operator(s). **Both the station licensee and the control operator are equally responsible for all transmissions** (97.103(a) and (b)). When you, the station licensee, designate others as control operators, you should make a note in the log. You are no longer required to carry a photocopy of your license whenever you are the control operator of a station, but it's still a good idea. (For a detailed look at this topic, see the *ARRL FCC Rule Book* available from ARRL HQ and Amateur Radio dealers). **A third-party is defined as anyone who does not have operating privileges on the frequency being used.**

Q. The trustee of our club callsign is an Extra. Does this mean our station can operate on any frequency?

A. No. The license class of the trustee is immaterial. A club callsign comes from a station license and carries no operating privileges. *A station may only operate according to the privileges of the Control Operator at the control point for that station.* Example, if a control operator is a General, the station may only operate using General class privileges.

Q. My call is being used for Field Day, but I can't be at the station for the duration of the event. (I like sleeping in my air-conditioned house, even during Field Day.) Do we have to take the transmitter off the air when I am not present?

A. No, you may designate a control operator or operators who should fulfill your duties as the station licensee. In fact, you don't have to be there at all, but you are responsible to make sure that your appointed control operator(s) is capable of carrying out your wishes (97.103(b) and 97.105).

Q. Can KA1UFZ, a Novice, operate the station of NUØX, an Extra Class operator, during Field Day? Can she operate in the Extra Class segment even though she holds a Novice class license?

A. The answer is "yes" to both of these questions, but a control operator must be continuously monitoring and supervising the novice whenever they operate outside of their Novice class privileges using the call of NUØX. FCC rules state that **"A control operator must ensure the immediate proper operation of the station..."** (97.105(a)). The rules go on to say, "A station may only be operated in the manner and to the extent permitted by the privileges authorized for the class of operator license held by the control operator" (97.105(b)).

Q. I am an Extra Class licensee, but I am going to use a Novice class operator's station and call sign during Field Day. Can I legally operate her station and use her call outside the Novice subbands?

A. You, the Extra, can be designated as the control operator. If you are authorized by the licensee, you may use the call sign of the Novice class licensee and operate within the Novice class privileges. However, if an Extra Class control operator wants to operate outside the Novice class operator privileges, he may do so, but he must identify by appending his call to that of the Novice, such as signing "KA1UFZ/NUØX" on CW or separating the calls by the word "stroke" on Phone (97.105(a) and (b), 97.119(d)). True, this is a long identification procedure, but it is the only way to identify in this case. Why would an Extra want to use a Novice call, you ask? Well, that may not always be the case, but it clearly illustrates the point.

Q. What is the identification procedure for a club station license during Field Day?

A. A club *station* license carries no operator privileges. The person operating the station must use his or her own privileges. If operation takes place in the Extra class part of the band, a Technician, for example, can use the station, but only if an Extra class control operator is present at the control point monitoring and supervising the operation. This does not necessitate the use of the supplementary station ID as mentioned in Section 97.119(e).

Q. Are there any exceptions to the FCC rules for Field Day?

A. **No, all FCC rules apply 365 days a year.** Of course, Field Day participants must also observe additional Field Day rules as set forth by the ARRL.

Q. During Field Day, members of the public wander through as we operate. Many times, these unlicensed individuals want to operate. Can they legally operate our Field Day station?

A. Only a licensed amateur is eligible to be the control operator, and obviously an unlicensed person can't be the control operator of an amateur station. However **they may participate under the direction of a control operator.** In cases of third party participation, the control operator must be present at the control point and must be continuously monitoring and supervising the third party's participation. Third parties may only communicate directly with countries with which the US has signed third-party agreements (97.115(a) and (b)). The FCC doesn't expect us to carry The FCC Rule Book along on Field Day, but they do expect us all to abide by the rules at all times. It is the hope of the ARRL that everyone will do lots of operating during Field Day, demonstrate Amateur Radio to the public, practice our emergency communications capabilities, eat lots of good Field Day cooking and most of all, have a good time doing it.

Q. During Field Day, there may be DX stations on the air. May they be worked?

A. In most cases, yes. However, if you are only participating as a third party under the supervision of a control operator, there must be a signed third-party agreement between the DX country's government and the US. The complete list of countries with which the US has Third Party agreements may be found at: <http://www.arrl.org/FandES/field/regulations/io/3rdparty.html>.

Q. We will be using a special 1 by 1 callsign for Field Day. Is there anything special we must do?

A. Yes, at least once per hour each station using the special call must also ID with the FCC-issued station call. (97.119(d))

The Four Steps Toward Successful Field Day Press Releases **By Jim Mulvey, KS1A, EMA Public Information Officer**

When last year's local club's Field Day publicity didn't make it into the newspaper, the Publicity Chairman couldn't understand why! After all, he wrote a press release and mailed it with plenty of time to spare. Still, it was passed by. Why? Because there are very specific steps you must follow to ensure that:

1. The right person actually reads your release. (Most are thrown out after a quick look.)

And

2. They print it.

Step 1. Know what you're up against.

First, the old days of the Spartan "just the facts" press release are over. At one time, all you needed to do was a straightforward "who, what, where, when and why" in the first paragraph with no editorializing. It's still being taught that way in journalism school, but it's not the way it's done in the real world!

Step 2. Understand that the biggest problem is having your release tossed in the trash.

At every media outlet (newspapers, television, and radio stations) there is one person who opens the press release mail. They can get a ton of releases every week; they are gathered up and opened by hand one by one, and unfortunately, they are almost all fluff from companies announcing the upgrade of a new improved food container, (yawn). The person must make a quick decision as to the importance of each one. He only reads the first paragraph, and he's usually standing over a wastebasket. Get the picture?

You must make sure the release is of interest to the readers. If you're town paper is the Billerica News, then make sure that "Billerica Radio Amateurs" are mentioned prominently! **You must catch the person's attention with the first couple of lines in your release or out it goes!** Worse, the person who opens the release may make a decision based upon what your envelope looks like. If it's very amateurish-looking, you may not even get a serious first glance. When writing the release, walk the fine line between making it exciting and keeping it factual. See the example provided.

Step 3. Delivering your release to its target.

We've included a sample news release for you to "customize" for local consumption. A good way to get it thrown away is to just drop it in an envelope and mail to your media outlet. That's not enough! Call the station or newspaper and ask for the city editor or assignment editor (for radio and TV). Get a name. Then, ask for the fax number.

Fax it to them! The fax is the fastest way to cut through the protective layers a company uses against their telephone and mail. A fax will get right through. Send your release a week in advance.

BINGO! The right person now has your release. It's separated from the usual pack; now you have a very good chance of getting the publicity you want and need. Re-send everything the day before the event.

Step 4. The Closer.

Include a contact telephone number. We've actually had newspapers call us back and ask to do a full story on the club! Getting publicity is more of an art than a science. It's important to remember that just writing and sending it isn't enough. Follow the steps, sound friendly but confident, don't try to come off as if you're promoting something as important as a medical breakthrough. Be sure to mention that the site looks great for cameras and photographers. Follow through and you just may score with every release you send.

Local "Hams" Take it to the Streets June 24-25

(Town, ST, date) -- Over the past year, the news has been full of reports of ham radio operators providing critical communications in emergencies world-wide. On the weekend of June 24-25 local residents will have a chance to meet and talk with ham radio operators and see for themselves what this "radio service" really is about. (***Your club name***) will be holding a demonstration of emergency communications abilities at (***location***) from (***day/time***) to (***day/time***).

This annual event, called "Field Day" is the climax of the week long "Amateur Radio Week" sponsored by the ARRL, the national association for Amateur Radio. Using only generators, batteries or solar power, the hams construct emergency stations in parks, shopping malls and back yards to test their skills under all situations. The slogan, "Ham radio works when other systems don't!" is more than just words to the hams as they prove they can send messages in many forms without the use of phone systems, internet or any other infrastructure that can be compromised in a crisis. More than 30,000 amateur radio operators across the country participated in last year's event.

"We hope that people will come and see for themselves, this is not your grandfather's radio anymore," said (***your club's spokesperson***). "It may be called 'Amateur Radio' because we are unpaid but that does not mean we're not prepared!"

Over the weekend hams will be demonstrating AM, sideband, FM, digital, code and even satellite communications. Several clubs will also be experimenting with TV signals and incredibly high frequency equipment. It was from their practical experience as hams that many electrical engineers went on to develop the marvels of today's communications.

There are 670,000 Amateur Radio operators in the US, and more than 2.5 million around the world. Through the ARRL hams provide emergency communications for the DHS Citizens' Corps, the American Red Cross, Salvation Army, FEMA and many state and local agencies.

To learn more about Amateur Radio, contact (***your club contact person***) at (***phone number***) or go to www.arrl.org/newham. The public is most cordially invited to come, meet and talk with the hams. They might even help you get on the air!

Field Day Message / Traffic Handling – 300 Points There for the Claiming By Dan Henderson, N1ND, ARRL Contest Branch Manager

Each year, hundreds of Field Day operations try and find every advantage to earn as many points as possible. But many overlook bonus point categories that can add a reliable 300 points to your group score: the group participation NTS message to the ARRL Section Manager, the W1AW Field Day bulletin, and the NTS formal traffic handling bonus.

Each Field Day group should generate a formal NTS-style piece to their ARRL Section Manager or Section Emergency Coordinator. This message should include the group's name, their location for Field Day, and the number of ARES members participating in the event. Most Section Managers make special provisions to have these messages handled during the regularly scheduled section traffic nets. Since it may mean that your group may have to take one of your stations away from operating normal Field Day contacts, your group is awarded the 100-point bonus for taking the time to pass this piece of traffic. To claim this bonus, you must submit a copy of the formal message with your Field Day entry. **Note: the Section Manager message does not count as one of the 10-NTS messages for bonus points.**

During a real emergency, there are often special bulletins transmitted by W1AW that will provide updates and important information. During Field Day, an official Field Day message is transmitted from W1AW twelve times on various bands and modes (Phone, CW, RTTY, and PSK31). The schedule of times for these bulletins is found in this packet with the list of rules. The W1AW frequencies are found each month in *QST*. The special Field Day bulletin is only available on-the-air during the Field Day period (it is not sent via the internet). **Your group will earn a 100-point bonus for including a copy of the W1AW bulletin with its Field Day submission. Also, stations will once again have the chance to copy the bulletin when K6KPH transmits the bulletins. Their schedule is also included in the rules.**

The NTS formal traffic-handling bonus is an excellent method of demonstrating Amateur Radio's formal communication ability. **All you have to do is have your Field Day team handle 10 formal National Traffic System (NTS) messages during the Field Day period. This involves 10 messages other than the Section Manager message noted above.**

NTS messages are among the most important means of communication that Amateur Radio handles during emergencies. Every ham operator, especially ARES members should know how to properly format and pass formal traffic. Whether they are formal requests for supplies from a served agency to emergency management officials, or situation updates between branches of the same agency, in an emergency these formal messages are at the heart of performing our role of support communications to local, state and national officials and agencies. They are emphasized during Field Day, so that we will all know the standard format and style in which they are exchanged.

Your group will earn its 100-bonus points by Originating, Relaying or Delivering ten different messages during the Field Day period (ten points per message, up to ten messages handled). These messages must be handled during the Field Day period. You may pass them on local, state or regional HF or VHF traffic nets, via the packet network, or when in contact with other amateurs willing to assist you in handling the traffic. Many local groups assign one of their HF stations to check-in to the state or local traffic or emergency net at the appropriate time during the Field Day period, as that provides a central clearing house for routing messages, just as would occur during an actual emergency.

The messages generated during the Field Day for bonus credit do not have to be addressed to a state or local official (though in doing so you may help them become more aware of our message-handling network). Some groups will address formal traffic to other clubs or have visitors prepare messages to their friends and families. **The key to remember is that all of the Field Day messages must be in standard ARRL NTS format.** A sample NTS message is found in this packet. Also you can download a wide variety of NTS forms and information material from <http://www.arrl.org/FandES/field/forms/>

You say you have never handled formal traffic before? Ask around your club. We bet it won't take too long to locate a member with traffic handling experience. Or contact Steve Ewald, WV1X, Emergency Communications Specialist at the ARRL at wv1x@arrl.org if you need specific questions answered.

Formal NTS style traffic plays a big role during an actual emergency. Use this bonus to help your club achieve additional points for the Field Day efforts as well as to hone your skills for this key part of emergency communications.

How to Succeed in Field Day By Really, REALLY Trying!

Helpful Field Day Tips

Here are some helpful hints that ought to help you plan and set up for your Field Day operation. Although every Field Day setup is different, and everyone has a different way of doing things, these tips should at least point you in the right direction.

Safety Tips

Safety First! Follow the ARRL safety code as you set up. Appoint one person "**safety officer**" and charge them with making sure no accidents happen.

More people are killed by contact with regular 120-V line service than by any other voltage. The voltages in many power supplies can be lethal! **Don't take any chances! Ground anything and everything.** Never use "three-prong" adapters to connect your equipment to your power source.

Have someone always on hand that is qualified in First Aid and CPR. This is a good idea for a club project to train all your members in these valuable skills before they are needed. Contact your local Red Cross chapter for more information in your area.

Always kill all power circuits completely before opening up a piece of equipment and trying to troubleshoot it. Never allow anyone else to switch the power on and off for you while you're working on something. Never try to fix something while you're tired or sleepy. If you're working on older tube-type gear, or an amplifier, always unplug the unit from the AC mains and wait at least 5 minutes before you begin. When troubleshooting this kind of equipment, always keep one hand in your pocket, as a precaution against accidental shock. Never wear watches or jewelry when you're working on gear.

Do not climb any tower without the proper equipment: a hard hat and a climbing belt are musts. **NEVER** climb an un-guyed tower. **NEVER** work on a tower alone. **Always** have someone on the ground to watch you. **Always** make certain that all mechanical connections are tight and secure before erecting a tower or an antenna. What may be easy to fix on the ground could be dangerous in the air. When erecting a tower, take your time and be safe! It's far too easy for someone to get caught on something, or have fingers or toes in the wrong place at the wrong time. Make certain any "spectators" are a safe distance away should anything untoward happen. **Alcohol and towers do not mix! If you drink, don't climb! If you climb, don't drink!**

Always make sure your guys are securely anchored, and that the guys themselves are sufficiently taut. Tying flags to guy wires in strategic spots will help prevent people from walking into them (especially visitors!). Make certain that the tower bases are secure and unlikely to shift in high winds.

Watch out for overhead power lines! Make certain they are at least twice the height of any antenna's height in distance away: an antenna 50' high should be at least 100' from any overhead line, for example.

Make certain that your group has enough fire extinguishers, and that everyone knows where they are. **Always keep a multipurpose fire extinguisher by the generator.** Never fuel a running generator. Never smoke around a generator. Keep the fuel in a separate place. Charge one or two people with the responsibility of monitoring the generators.

Generators should always be kept outdoors in an area with good air circulation. This will prevent the possibility of exhaust and gas fumes building up.

Check all your extension cords prior to setup for signs of wear or fraying. Discard any that show even the slightest wear. Guard all outlets from any water. Make sure the wire sizes are adequate enough to handle the load.

Watch out for lightning! Storms can develop and move quickly. At the first sign of a storm, disconnect all antennas from the rigs, shut down the generators, and head for shelter. You don't have to take a direct hit in order to sustain damage, or electrical shock. Summer thunderstorms are accompanied by high winds and rain. **Play it safe!**

During an overnight operation, **make sure that there is adequate security for those involved.** More than one Field Day operation has discovered too late that equipment has been permanently "borrowed" from an operating position left unattended during the wee-hours of the morning.

Setup

Check out your operating site ahead of time. **Avoid confusion on Field Day by preparing a work plan.** You'll want to determine where antenna, power sources, and operating positions should be placed. Coordinate in advance the order for each task. Make sure that all essential items will be on hand when they are needed. Don't forget the essential creature comforts, such as trash cans, toilet paper, flashlights, bug spray, first aid kit, etc.

Nothing can kill the Field Day enthusiasm faster than not having sufficient help to set-up and tear-down the site. **Sign up your volunteers early.**

Always have designated "tour guides"; that is persons ready to guide any visitors who might happen by your site and show an interest in ham radio. This is also a good way to drum up interest in a class. Besides, not only is this a chance to show off your hobby in a favorable light, but it is also worth some bonus points! Set up a table with some handouts about ham radio, your club,

Field Day, whatever. Type up a sheet that describes your club, the operation, and include a person to contact for more information. When giving a tour, make sure not to lapse into "ham speak": try to explain what people are looking at in as easy-to-understand language as you can.

If media comes by, **make certain that something is going on.** TV, radio and print journalists will be much more impressed to see antennas going up and people making contacts than they will by a group of guys sitting around drinking beer.

Many clubs "turn out the operators" by combining Field Day with family activities, such as a picnic. Others send a mailing to all their area hams with a map to the FD site along with some information. **Be creative!** There are likely a number of hams in your community who'd love the chance to come and help out. What ham can ignore a good covered dish supper?

Give everyone something to do. Newer hams can do 2-meter talk-ins, help setup a GOTA station, or help assemble antennas. The more people are involved, the better time you'll have. This is also a great chance to give some of your newer hams some practical experience. And don't forget to do what it takes to get the new hams ON THE AIR – after all, **Field Day is a great opportunity for new hams to learn how to operate!**

Keep a handy list of ARRL section abbreviations at every operating position. This will eliminate possible confusion later on. If everyone uses the same abbreviations, you'll save yourself some headaches when it comes time to check the logs over.

Make sure everyone keeps up the dupe sheets. More than one club has lost contacts by not keeping the dupe sheet up-to-date with the log at all times. If you have operators who have never used one, sit them down with someone beforehand to show them how it's done. **Consider a club program before Field Day to familiarize your members with the necessary forms for logging, duping and operating.**

Finally, before the actual start of operating, have a final "participant briefing" so that all involved know the necessary safety and operational information. It's a great way to officially kick off the weekend!

Operating

Keep an ever-constant eye on 10 meters. If 10 opens up, you should have lots of stations to work. If the band is quiet, don't assume that it's dead. Throw out a CQ or try to stir up interest. Everyone else could be listening, too!

Try to listen around on the bands the week before Field Day. This could give you a good idea of what to expect in the way of propagation during Field Day. Check your logs from previous years and see if you can spot any trends, i.e. hours when certain bands were open, or had a high level of activity. Certain bands in certain areas can be extremely important in working up a good score. For example, 40 meters on the East Coast is a bread and butter band for Field Day. Decide which bands are going to be the most important to your score and try to maximize your effort on them by using the best antennas possible combined with your best gear and best operators.

Don't ignore one mode for another. Many groups have concentrated on CW only to miss out on some easy Phone contacts, and vice versa. Always keep in mind that every contact counts, no matter what the mode.

Read the rules very carefully. Look over the bonus points available. A number of these could be relatively easy to earn. If your club has any traffic handlers, they could easily help you earn the NTS message bonus. Copy the W1AW bulletin! This is an easy 100 points. W1AW comes on the air several times each day to give you an extra chance to copy the message. Remember! Every 100 bonus points you earn are that many QSOs you wouldn't need to make to have the same score.

On Using Computers and Logging

Computer logging has become the reality of Field Day. Computer logging, when it works, can make operating much more enjoyable and shrink your after-event paperwork to virtually nothing. When it doesn't work, you can have a lynch mob out for blood. Here are some handy suggestions for making everything run smoother.

Check out your software ahead of time. Make certain that it works on all the computers you'll be using. If you're using a software package that allows linking stations (i.e. more than one computer tied together) make sure that they can communicate with each other before Field Day starts. Have a handy sheet available with the most commonly used commands. Consider a meeting where everyone can sit down and become familiar with the computer and software before Field Day. Also, have a sheet available at each station with a list of the ARRL/RAC Sections for easy reference.

Whatever software you use should have an "auto-save" feature. This allows the computer to save every QSO to disk as it happens so that nothing is lost should the power fail. Others allow you to keep a printer on-line to provide you with a running paper tally of your contacts. And **make sure your computer has the proper date and time set** before operating. This will save you many problems in the long run.

Finally, make sure you submit the entry on time. A valid entry must include: a) A completely filled out Summary Sheet; b) Proofs of any Bonus Points claimed; and c) Dupe sheets separated by Band and Mode.

Field Day's Over... Now What? Tips for Submitting Your Field Day Entry

The last QSO has been logged. The antennas have come down. The generator and tents have been cleaned and stored until needed again. So, now what do you do with all of the paper and files created during your Field Day exercise? Here is a guide to making sure your Field Day entry is correct and included in the results. **Remember that all entries must be postmarked or emailed by July 25, 2006.**

The easiest way to send your information to the ARRL is to use the web application found at www.b4h.net/cabforms. This excellent web applet allows you to electronically submit your Summary Sheet information to the ARRL, getting your information directly into a database for inclusion. The form follows the information on the official ARRL Field Day Summary Sheet. Just fill in all the blanks. The application will prompt you if there is invalid or incomplete information. Once that is done, simply click <SUBMIT ENTRY> at the bottom and your Field Day summary information will be on its way to the ARRL, as well as a copy emailed back to you for your records. Don't forget, **there is a 50 point bonus for submitting your entry via the web applet.**

If you use the web application, you must still either email or land mail any supporting documents to the ARRL. You may email dupe sheets and proofs of bonus points as attachments to a message sent to FIELDDAY@arrl.org. **In the subject line, please include the callsign under which the summary was submitted and the words "Supporting Documentation."** Photos, copies of letters, sign-in sheets, dupe sheets, etc can be in almost much any format (jpg, tif, gif, doc files, etc). If you decide to regular mail the supporting documents, you may send them to: **Field Day, ARRL, 225 Main St, Newington, CT 06111. Please mark on the outside of the envelope the callsign which the documents support.**

If you choose to email all of your information but not use the web application, you should send a completed summary sheet (or reasonable facsimile thereof) and all files supporting the entry to FIELDDAY@arrl.org. Note that while we will accept the Cabrillo log file in lieu of the dupe sheets, **the Cabrillo format does not include all of the required reporting information, so you must still include a completed Field Day Summary Sheet. In the subject line of your email please put your callsign first.**

If you decide to send the entry via the regular mail, there are a few items that you should pay special attention to:

- A) Make sure that the summary sheet is **legible**. The biggest problem with paper entries results from HQ staff not being able to read the information on the form.
- B) Make sure you **complete** all information on the form. Leaving information blank results in delaying the processing of your submission.
- C) **Verify** all of the information before you mail the entry. For example, the ARRL section should be the section you used as your exchange during Field Day. A check of the information on your summary helps eliminate inputting bad data into the ARRL database.
- D) Don't forget your **required** dupe sheets. A diskette with them is fine, or you may send printed copies. We also will accept the Cabrillo file from a computer logging program in lieu of the dupe sheet.
- E) Make sure you **enclose** copies of the various things you are using to claim the bonus points – copy of the WIAW message, visitor sign-in sheet, copy of the NTS message to the section manager, etc, copy of the press release or of the article from the newspaper, etc.

Once your packet is assembled, mail it to: **Field Day Submission, ARRL, 225 Main St, Newington CT 06111.**

ARRL Field Day On-Line Soapbox

www.arrl.org/contests/soapbox/

Each year the ARRL receives thousands of photos and items related to Field Day. We are only able to include a very few of the items in *QST* or on the *ARRLWeb* results for Field Day. So in 2002, we started providing a website where individuals and groups could post their photos and stories to share with their fellow participants as soon as Field Day was over.

At the *ARRL Contest Soapbox* (www.arrl.org/contests/soapbox/) you can browse through the shared fun from other group's Field Day (and other operating) activities. Many groups have reported they read about a unique idea in the *Soapbox* and implemented it at their next Field Day. So, be creative. Share your special techniques and ideas. Here are a few guidelines to keep in mind when posting your story and photos:

1. This site is for participants in ARRL events to post their comments and impressions on the most recent activity. This may include extended soapbox comments, photographs or a narrative of their operation from the perspective of you, the participant.
2. Please keep your comments focused on your involvement in the event. There are other more appropriate forums for extended discussions between participants. This forum is open to both members and non-members of the ARRL. It is also available for those who might be learning about contesting or new to amateur radio in general. Keep in mind that the potential audience that may be reviewing your posts is broad, so we encourage you to exercise decorum in your postings.
3. The ARRL reserves the right to edit or decline posts that may be inappropriate to this forum.
4. Responsibility for content of all posted material rests exclusively with the item author. ARRL staff assumes no responsibility for errors, omissions, and accuracy of items appearing on this page. All questions and comments should be directed to the item author.

If you have questions or comments about this addition to our Contest coverage, please contact the ARRL Contest Branch at contests@arrl.org

ARRL Field Day 2006 T-Shirts and Pins **Ordering Instructions**

Official ARRL Field Day T-shirts and Pins are now available for ordering.

Since its modest beginnings in 1933, ARRL Field Day has grown into a premier operating event for thousands of radio amateurs. The activity places a premium on developing skills to meet the challenges of emergency preparedness as well acquainting the general public with the capabilities of Amateur Radio. For many radio clubs, Field Day stations are operated in less than optimal conditions--setup in camp-like fashion. Others operate free of commercial power, using only generators, solar energy or other alternate power sources. Entry categories also encourage participation from individual hams operating from their home stations. It's fun for everyone!

The T-shirts and pins are a great way to recognize your involvement in this popular, annual operating event. Distinctive pins are also available to help identify GOTA (GET ON THE AIR) operators. Make sure you have these attractive keepsakes in time for Field Day!

Clubs, order early! Collect orders from members, and place a single order (SAVE SHIPPING and pay only \$12 shipping for orders over \$75). **Items begin shipping in April.**

2006 Field Day is June 24-25.

QUICK ORDER on the ARRLWeb: www.arrl.org/FieldDay

(See reverse side for **Mail-In Order Form**)

2006 Field Day Pins
Size 1" x 1"
