

# The Ham in The Hat— ARRL Field Day 2003

*With apologies and homage to  
Theodor Geisel*

*The Sun it did shine as they started to  
play.*

*In some places it rained on that warm  
late June day.*

*The annual rite known as Field Day  
had come*

*Though it would mean work—It would  
also mean fun.*

*At thousands of places some walked  
and some sat*

*Some were lanky. Some tall. Some  
short. Some were fat.*

*But at each Field Day site like Babe  
Ruth with his bat*

*Would be a great leader...The Ham in  
The Hat*

When the summer solstice arrives, thoughts of the Amateur community throughout the Americas are fixed on what has perhaps become the greatest operating event each year—ARRL Field Day. In 2003, from near the Arctic Circle in Alaska to Palmer Station, Antarctica... Across the states of the US and the provinces and territories of Canada... With several DX stations participating (including the first-ever joint US-Cuban Field Day operation (see page 45 of this issue)... Field Day continued in the tradition of being a premier test of our hobby's emergency communications capability.

*The Ham in The Hat said "Do not  
frown or be blue*

*To get this place ready there is so much  
to do.*

*We all know a trick we can use in this  
race*

*For all have some skill they can bring  
to this place."*

*Some hung their antennas from high-  
flying big kites*

*Some ran their transmitters by peddling  
their bikes.*

Preparation for Field Day is rarely left to the last minute. Some groups book their site the day after the end of the previous Field Day. Recruiting band captains and operators...testing the generator...

planning the site layout... advertising to the public...inviting special guests...The "to do" list for Field Day can go on and on. In 2003, entries were received from a total of 2114 groups and individuals. This is a slight increase in logs from the previous year, but still marks the highest number of reports ever received for the event.

*Some sat inside trailers. Some sat in-  
side tents*

*Some sat safe inside front of cold AC  
vents.*

*While ol' Mr Murphy at times got his  
kicks*

*'Twas Field Day that won with some  
twists and new tricks.*

This year, a new entry class was added—the **Class F or EOC Station**.

They accounted for a total of 8% of all entries received during 2004. This new category encouraged groups to coordinate their operations with their various local and state Emergency Operations Centers—a key interface in any emergency plan. Class A, as always, was the most popular category, accounting for about 59% of all entries. Among the Class A operations, over one-third (38%) operated with 2 transmitters, making it the most popular individual category (see Table 2).

There was a decline in the number of reported participants during this year's Field Day—32,824 down 5% from 34,398. One astute Field Day observer noted that this may not have been due to a lack of interest in 2003, but rather due to increased participation in 2002 follow-

**The Ham in The Hat** paid a visit to the AG4KM GOTA station of the W4BS Delta (TN) ARC and must have left his hat. KG4NBM (left) is control operator while W4RMV (right) and K3LK (behind) watch KG4NBM's stepdaughter operate from under the hat.

**Table 1**

ing the events of September 11, 2001.  
*And when Field Day had started, How  
they talked and they talked.*

*How they talked and they talked and  
they talked and they talked*  
Some talked with CW. Some with single  
sideband

*PSK and with RTTY they talked 'cross  
the land.*

The total number of QSOs reported was off significantly during 2003—down to 1.15 from 1.42 million, or a decline of about 20%. This was in part due to generally very poor propagation, especially on two of the most popular bands—10 and 15 meters. There were declines in the number of QSOs on all three basic modes.

*And if you looked up and you stared  
into space*

*The great ISS our earthly Field Day did  
grace.*

For the third consecutive year, Field Day has been an “out of this world” experience, thanks to the participation of a licensed amateur on the International Space Station. This year the operator at the helm at NA1SS was Mission Specialist, ISS Flight Engineer Ed Lu, KC5WKJ.

*The Ham in That Hat, he would know  
what to do.*

*How to use both the rigs—old Rig One  
and Rig Two.*

*Many groups they planned hard and  
included a GOTA*

*To make sure their group met its high  
QSO quota.*

The “Get On The Air” Station—better known as GOTA—once again proved popular, as a total of 380 GOTA stations were reported. This means about one-

The all-bicycle mobile station of WD8AAU from Dayton, Ohio. Not a huge score, but Daniel had a great time.

third (35.7%) of GOTA-eligible entries took advantage of this unique way to kindle (or rekindle) interest in our hobby. *The Ham in The Hat met officials with glee.*

*If duty does call, you can always call  
We!*

Keeping the focus on the fact that Field Day is the principal way we demonstrate and test our emergency communications capabilities led to an expansion of the 100 point bonus for having an invited governmental official attend your setup. This time a second 100 point bonus could be earned by having an official of one of the various served agencies attend your Field Day. The majority of the Class A stations cashed in on the expanded bonus, which helps broaden the visibility of ARES, RACES, and Amateur Radio communications in our various communities.

*With appetite that sometimes was voracious*

*To the covered dish-cookers the Ham he  
was gracious.*

*No Field Day event is ever complete*

*Till the dishes are full of good things to  
eat.*

Everyone knows that Field Day has also become “the social event” for many clubs. What better combination to bring people together—good food, great friendship, a learning experience and a challenge to master. Be sure you visit the ARRL Contest Soapbox On-line at [www.arrl.org/contests/soapbox](http://www.arrl.org/contests/soapbox), where over 140 clubs, groups and individuals across the landscape share a small part

of the Field Day story. And consider adding your photographs and memories to the site. It’s a great way to share your experience and might serve to pique the interest of a potential new amateur or member for your club.

Members, make sure you visit the expanded Field Day results on-line at [www.arrl.org/contests/results](http://www.arrl.org/contests/results). There you will find an expanded write-up, some interesting tables and charts, and an interesting sidebar from that eloquent purveyor of propagation lore and knowledge, Carl, K9LA.

*The Ham in The Hat, he spent the whole  
night.*

*To do something else, it just wouldn’t be  
right.*

*'Mid thunder and lightning and a great  
'puter crash*

*The Ham in The Hat—then the record  
did smash.*

*And what was this record he held so  
near and so dear?*

*Why, the record for fun he could have in  
a year.*

*And when the last QSO had finished its  
sound*

*And antennas were once flat again on  
the ground*

*A discovery of great importance was  
found...*

*A discovery discovered at each Field  
Day around...*

*The Ham in The Hat was not one ham  
or two.*

*It is every ham in the whole Field Day  
zoo.*

Field Day has something that appeals to

BELLINGHAM HERALD  
When you get past the magnificent view  
of the club's namesake, that's Doyle,  
KC7GX, mounting the 20 meter Yagi for  
the K7ZC Mount Baker ARC (WA) CW  
station.

everyone. It may be the social aspect. It might be the contesting-type atmosphere. Perhaps you are drawn in to accept the challenge of testing your skills under less than optimum circumstances. Your computer skills may be what the group needs to keep them logging. Your old 10 kW generator

may be just the thing to allow your group to add the extra station or keep the coffee-pot brewing overnight.

Whatever your reason, there are thousands of hams across the bands that share your interests. The time to start planning is now. Field Day 2004 will be held, as

always, the fourth full weekend in June—this time around June 26-27. Hope to see you on the bands!

*When next summer comes calling do not  
be caught flat.*

*But jump in and play. Be the Ham in  
The Hat.*

## Scores

Class A stations are clubs or nonclub groups operating with more than two operators. Score listings are grouped according to the number of transmitters in simultaneous operation. The listings show club or group name, call sign(s) used, total number of QSOs, number indicating power output used (5 is less than 5 W, 2 is less than 150 W; 1 is more than 150 W), number of participants and total score including bonus points and ARRL section. Scores are listed from highest to lowest in each class. Class B stations are portables manned by one or two operators. When there are two operators, the other operator's call is listed in parentheses, if it is known. Class C stations are mobiles. Class D stations are home stations using commercial power. Class E stations are home stations using emergency power. Class F stations are EOC stations.

The K5WPH Sun City (TX) ARC was a hub of activity.

N0SRF and KE0PX take a moment to say "cheese" while operating in Colorado.
