

IARU HF Championship 2017 Results

By Doug Grant, K1DG, dougek1dg@gmail.com

“Should I stay or should I go?”

This was the question a lot of operators asked themselves for the 2017 IARU HF Championship. While the majority of entrants used their home stations, this year a lot of operators traveled somewhere else to operate for one reason or another. And some took advantage of logging in to remote stations to post some big scores while staying home. First, let's look at some noteworthy scores and close races...

Single-operator

Andy Sachkov, LZ2HM, traveled to the P33W superstation in Cyprus and racked up a 4.9M point score in the Single-operator, Mixed-mode, High Power category, far outpacing everyone else in the world. R2AA stayed home and posted an impressive 3.9M point score for second place and tops in Europe. Kevin, N5DX, connected to the N2QV remote station and edged out CG3AT (VE3AT, op) for the top W/VE score.

In the Mixed-mode, Low Power category, it was a close race with Manfred, DJ5MW, (operating a WRTC-style station...more on this later) just edging out RW4WA.

The Phone-only, High Power category saw Bill, K4XS, operating as KH7B from his new and still-under-construction station in Hawaii, run away from everyone, nearly doubling the score of runner-up US5D (operated by UT7DX). Bill did not even have antennas for 80 or 160 meters available!

RG6G topped the CW-only, High power category, which had four W/VE stations make the Top Ten World list. The W/VE competition was extremely close, with Tom, K1KI, squeaking past W1KM by about 0.5%. Both of them were operating from their home stations, and 'KI reported that his post-contest “nap” lasted 8 hours.

The CW-only, Low Power category also saw a close race among R8WF, UT5EO, and LY5R, with the three scores within +/-2%. R8WF finished on top. K7SV was the only W/VE in the Top Ten.

The CW-only QRP category was another close one, with W7YAQ narrowly prevailing over UR5FEO.

Tomek, SQ9C, operates while station owner, Maciek, SP2XF, watches the QSO rate on the screen at the 20-meter station of SNØHQ in the very center of Poland. (photo by Henryk Kotowski, SMØJHF)

Single-operator Unlimited

This relatively new category has become very popular since it was added in 2015. However, the winners seemed to run away in every Unlimited entry class this time. In the Mixed-mode category, the winners were HA3NU (High Power), UZ3A operated by UX1AA (Low Power), and HA5PP (QRP), all by margins of 30% or more.

In the W/VE competition, the Mixed-mode, High Power category was the only close race, with Victor, VA2WA, (who moved from Russia in the 2000s to make Canada his new home) scoring a “victor-y” over Victor, N8OO (who moved to Louisiana from Turkmenistan in the mid-90s).

Multioperator

The EF8R team took full advantage of their African location and high point value for QSOs with Europe and the U.S. to crush the competition with over 10 million points. Second place went to RM9A in Asia, and third to CN3A (Africa). Top European multiop was IR4X. In the

W/VE competition, K5PI did the CW while K5TR did the SSB at the K5TR station near Austin, Texas, and they edged out East Coaster KD4D (operating at the N3HBX station).

This is the 10 Meter SSB and 160 Meter CW station of EF4HQ. Operators there were EA5s EN, HT, and SR (photo courtesy of EC4DX)

Headquarters and IARU Special Stations

The national societies, especially in Europe, have always enjoyed a spirited competition in this contest. They begin planning months in advance and spread their stations out all over their country, choosing the best-equipped stations for each band, and combining the scores. This year EF4HQ, representing the URE (Unión de Radioaficionados Españoles) in Spain, took the prize, with DAØHQ (DARC, Germany) and TMØHQ (REF, France) in close pursuit. DAØHQ piled up almost 17,000 QSOs (compared to EF4HQ's 13,000), but a huge percentage were from their own country and carried lower point value.

WJ2O and W2GN operating as W1AW/2 at the W2FU station in upstate New York (W2FU photo)

Of special interest in the U.S., the ARRL HQ station callsign was assigned to a group of 10 operators using 5 locations in Western New York this year, operating as W1AW/2, and a group of 14 operators spread out at three locations in Louisiana used the IARU HQ callsign NU1AW/5.

LY9A and LY4L practiced for WRTC2018 by operating as DP4T, while LY5Y played the role of referee (DF9XV photo)

Most active countries

Logs were received from 134 different countries, demonstrating the broad international appeal of this event. The top ten countries from which the highest numbers of logs were submitted is shown below:

Country	Logs submitted
U.S.A.	876
Germany	354
European Russia	277
Japan	270
Poland	190
Ukraine	176
Italy	157
Spain	108
Asiatic Russia	106
Canada	77

Thanks to the World Wide Radio Operators Foundation (WWROF, www.wwrof.org) for providing the log-scoring for the HQ station competition.

Traveling Operators

Some operators (like LZ2HM) traveled to big stations in rare locations and were rewarded with winning scores. But there were some other interesting travel stories.

Eric, KV1J, has operated numerous times as FP/KV1J from the island of St. Pierre. This time, he discovered that the house where he usually operates had been sold! He posted on 3830scores.com that since the antennas were on someone else's property he had to keep it simple (a 20M - 10M Spider beam and an off-center-fed dipole both only 4 meters up). The rainy weather prevented him from turning the beam often, which limited his score, but he enjoyed handing out an unexpected entity.

K2NV/VE3 combined contesting with sailing, operating from his sailboat near St. Catherines, ON.

DL/NC6B was traveling through Germany on a river cruise. When the ship docked he ran out, set up his dipole and 5-watt KX3 with 25 minutes left in the contest, and made two contacts.

Jim, K8MR, was on vacation with his family in Long Beach Island, NJ, and brought along his KX3 and suspended dipoles from a 12-foot mast on the small rooftop deck, draping the wires over the edge. He managed 40 QSOs but operating time was limited when his mighty 5-watt transmitter implausibly tripped the circuit breakers in the house.

Home, but Remote

A number of operators made excellent scores using remote stations. N5DX, for example, took top honors in the W/VE Single-operator, Mixed-Mode, High Power category.

VE3UTT and VE3EY got off to a great start using the VE3UTT remote station, but when they moved to 80M, the RF shut down the router at the remote site and their contest was over.

Andy, K2LE, (in New York) and Gerry, W1VE, (in New Hampshire) took turns using the K2LE remote station in Vermont. Andy noted that Internet speed is still a limiting factor in trying to use rotators on multiple towers and the station is a work in process.

A "Homecoming"

Veteran contestster George, WØUA, has always enjoyed this contest and operated many times from the excellent station of Chuck, KØRF. For the past two years, health issues and a fire at KØRF prevented any kind of operation. However, George reported on 3830scores.com that the station is rebuilt, health issues are resolved, and he was able to both key his way to a terrific CW-only High Power score AND play a round of sleep-deprived golf in 98-degree heat Sunday afternoon. Welcome back, OM!

No Place Like Home

Since this contest takes place in prime thunderstorm season in the Northern Hemisphere, numerous stations from N1UR in Vermont to XW1IC in Laos reported having to shut down due to lightning in the area.

Larry, K4AB, observed that propagation conditions were pretty good, with no solar storms and no lightning at his QTH.

Max, NG7M, was glad to be in the air-conditioned shack while outside temperatures in Utah climbed to over 104 degrees.

Jeff, N8II, reported that he was handicapped by having to deal with peeling and slicing a bumper crop of peaches. Now that's an excuse we have not heard before!

The Battle Deep in the Heart of Texas

Jim, N3BB, entered the Single-operator, CW-only, High Power category and noted on 3830scores.com that there was major league competition in Texas from WXØB (AD5Q, op) and K5GN. Jim had spent the past year rebuilding and improving his station inside the Austin city limits and was happy with the station performance and conditions (except for a shutout on 10 meters). In the end, he managed to just get past WXØB near Dallas by a mere 1.5%. But K5GN near Houston rocketed past them both with 1.8M points and can claim Texas CW bragging rights.

Traveling (or staying home) with a purpose

The [World Radiosport Team Championship](#) (WRTC) will take place during the IARU HF Championship in 2018. While the Team Leaders were not announced officially until October 2017, many of the positions were clinched before then.

Several teams and individual operators used the 2017 IARU contest as a warmup and some even traveled to Europe to get a feel for conditions there. Most operated “WRTC-style” with 100 watts, no DX cluster, a Spiderbeam-type antenna at 12 meters or so, and dipoles for 40 and 80 meters.

W2GD (L) and AA3B will compete in the 2018 WRTC and practiced in 2017 as DR5F (W2GD photo)

Some of the active “practice” stations were:

- DR5F (W2GD/AA3B)
- NP4Z (NP4Z/AD4Z)
- RW2F (RA2FA/UA2FB)
- LZ5R (K1LZ/YO9GZU)
- HG2U (N4YDU)
- DP4T (LY9A/LY4L)
- DR4A (JH5GHH)
- SC9W (SM3SGP/SM5AJV)
- DM3W (DJ5MW, bronze medal at WRTC2014)
- DM2M (N6MJ/KL9A, WRTC2014 winners)
- UW5Y (US2YW/UW7LL)

- UR7D (URØMC/VE3DZ)
- DR4W (AE6Y/N6XI operating remote from W6!)
- DP6M (K5WA, who combined the trip with his wedding anniversary trip)

The WRTC stations operate in “Multi-2” mode and have different scoring rules, so their entries were not all valid for the IARU contest. But they all learned from the experience and expect to have an edge on their competition in 2018. Will it pay off? We’ll see...

WRTC2014 Gold Medal winners Dan, N6MJ, (shown) and Chris, KL9A, traveled to Germany and operated WRTC-style as DM2M (KL9A photo)

Be there in 2018!

You will not want to miss the IARU HF Championship / WRTC in 2018. It will be THE Radiosport event of the year. The WRTC2018 organizers in Germany have been working hard for four years to produce an event that promises to be exciting for everyone involved, either in person in Germany or on the air.

Mark your calendar now for the weekend of July 14-15, 2018. The fun starts at 1200Z, and runs for 24 hours.
