

# 1998 ARRL September VHF QSO Party Results

**T**he best laid plans of mice and men..." We know the rest of this quote though few of us can remember the source. And this year, it seems to be exactly what occurred during the 1998 September VHF QSO Party. From ardent multi-op stations to the casual participant, summary sheets were replete with tales of preparation and planning designed to maximize effort in this year's event. Rovers planned their routes. New antennas were mounted. Recruits for multi-op stations were trained. But it seems someone was not invited to party: Propagation.

The real star of this year's event may have been what one entry called "dismal" band conditions. When compared to the successful June VHF QSO Party (see results December 1998 *QST*), participation, entries received, QSO totals, and multipliers worked all were down. Scoring was also lower than in June. The hard-core VHF community was visible, but more than one log bemoaned the lack of the "casual" contestor.

Making the best of band conditions is a hallmark trait of outstanding operators. Two stations set new overall September scoring records for their entry categories. "The Man" was at it again as WA8WZG, who swept all 4 major ARRL VHF/UHF contests in 1997, upped his Single Op September record to 465,915, bettering the 394,744 mark he set last year.

New Single-Op Division scoring records

were set by WA8WZG (Delta), K1TEO (New England), KE7SW (Northwestern), N6KBX (Pacific) and K5IUA (West Gulf) while new Division Rover marks were set by N1MJD (New England), K7XC (Pacific), N6TEB (Southwestern), and VE3OIL in

## Top Ten

K3QII	39,520

Canada. Only W8TL/3 (Atlantic) was able to establish a new Division standard in the QRP Portable category. In the Multi-Op category the K8GP operation set a new Roanoke Division mark while the N5WS group raised the bar in the West Gulf Division. Rounding out the record setters from the Limited Multi-Op Division category were groups manning the stations of K2BAR (Hudson), NC1I (New England), W6MMM (Pacific), and W4CMA (South-eastern). Well done to these outstanding achievers.

A particularly disturbing remark appeared in a number of Soapbox comments: "The 'pop-gun' contestor doesn't really matter." Let's put this sentiment to rest: *Every entry matters*. Whether you score 300K and you are a perpetual Division leader, or you casually make 20 QSOs in two grid squares, it takes every entrant to make any contest a success. It was encouraging to hear comments about the return of old call signs to the scene, as well as some larger stations encouraging others to listen out for local "little guys." Still, it was disheartening to hear so many comments about participation being down.

When you participate in any of our contests, remember to submit your log, including your items for the Soapbox section. Don't worry if it isn't a world beater or record setter. You might be surprised how well you did compared to others in your

AB4CR really had a hard time explaining to his wife that the halo was standard equipment for the new car, even before the license plate was added.

Matt Bennett, KF6RTB, visits the station of John Kountz, KE6GFF, and learns about contesting.

section working under similar conditions. Some sections only have a few logs submitted. It has never been easier to enter any of our contests. With the ability to electronically submit entries to the Contest Branch, you don't have to worry about unreliable delivery times of the postal service. Visit the Contest Branch homepage at <http://www.arrl.org/contest> for details, entry forms, logs sheets, general information, schedules, rules and results.

We look at every log and read every soapbox comment. This is how we get a feel for what the contest weekend was like

in your area. Sitting in Headquarters, we can't determine if there were better conditions in California or if there was some good sporadic E in Minnesota unless you tell us. Your photographs also give us a sense of what participants are doing in terms of creativity and experimentation. We can only print a few of the photographs and comments we receive, but believe me, they are valuable tools as we put together each article. One note about photographs: Please attach labels, including names and callsigns of those in the photo, to the back of the snapshot. When you write on the photograph proper, it sometimes makes it unusable for us to print.

Get yourselves ready for the 1999 June VHF QSO Party, set for June 14-15. Besides the sunscreen and the cool clothes, be sure to check out your feed lines, good tires for your roving vehicle, and stock in goodies for the cooler. Oh, and someone please remember to invite Mr. Propagation this time. The pleasure of his company is always welcomed. We all hope he RSVP's in the affirmative!

## Soapbox

Not as much activity as in June, but all in all it was a lot of fun (AA6W)... At times, tropospheric conditions were unusually good up to 1296 (K7IVW)... Conditions were completely flat. I need to finish building a real antenna for 6m (VE2ZP)... My first contest. All I had hoped to do was qualify for the Participation Pin (KF6RCI)... Super weather, good operating locations, fair propagation except for 50 MHz (WB7DHC/R)... Highlights must be the TE contacts to South America Sunday afternoon (W5UWB)... Sunday morning was so slow I went to a hamfest, but am looking forward to January already (KB8UUZ)... Perhaps poor conditions, producing weak signals, made CW a good mode for making contacts (K4ME)... My last entry in a VHF contest was from NNJ circa 1958. Grids were not known at that time. We worked sections around the country. Of course, then the only modes were AM and CW (K2IUK)... It was a good learning experience and lots of fun (KB6YAD)... If not for about three hours of sporadic on 6 meters, the contest would have been pretty dismal. Conditions for tropo were really poor and this did not provide the usual 432 MHz contacts (W0PHD)... Mix a VHF contest with helping in a public service overnight bike ride and you have a LONG weekend and LOTS of fun (AD4F)... Who said you have to be high on a hill to

work the VHF Contests? With less than 1000 feet elevation our contest site for W9ICE came together. We found that with good planning, equipment and dedicated operators you can be competitive from any location (WB9YCZ)... I took a lightning strike a week before the contest, so I had to borrow a few radios (VE3TMG)... My harmonic-op-in-training Susan and I had a great time roving and mountain topping. Thanks to K6NHK/R who put up with our invading his spot on Keller Peak (N6DN)... Thanks to the local "big guns" who made sure that the 'good ones' knew to turn this way and work us little guys too (KC8AQH)... The weather was great at 8013 feet: sunny days and 78° and clear nights at 38°. The entire group appreciated the absences of Murphy this September (WB2ODH/6)... The biggest thrill was watching my two 13 year old grandsons' eyes light up with

each new grid square. It won't be long before I have competition from them (WA9LZM)... This time it was no place for a "blue collar" station (W1FEZY)... More CW activity would yield more QSOs. Break out those keys, bugs and paddles for January (W9KHH)... It had not rained all summer. Guess what? (WD5AGU)... My QTH, while pleasantly

overlooking the Pacific Ocean, is ringed to the north and east by mountains. I now need a couple thousand more feet up or a few less mountains (KE6GFF)... My friend Aki (7M3CQJ) and I come from Japan to participate in this contest. OM Dave WB0GAZ prepared a fine VHF/UHF multi-band system for us (JO2AJT/WH2O)... it was good to

hear some calls that have been absent for a while – plus it takes a while to get used to the new vanity calls the hardened VHF contestants have changed to (N8PVT)... I drove 3½ hours then an additional two hours of backpacking 50 pounds over 2 miles of trails climbing 1300 feet of elevation to operate QRP portable DM43 (WA9TKK)...

## Scores

Each line score lists call sign, score, stations worked, multipliers, number of grids activated (if Rover), and bands (A = 50 MHz, B = 144 MHz, C = 222 MHz, D = 432 MHz, E = 902 MHz, F = 1296 MHz, G = 3456 MHz, H = 5760 MHz, I = 10 GHz, J = 24 GHz, K = 47 GHz, L = 75 GHz, M = 119 GHz, N = 142 GHz, O = 241 GHz, P = 300+ GHz). Call signs of Division leaders and band indicators are listed in **boldface** type.
