the reprinted material. Send the request
to the office of the Publications Manager
(permission@arrl.org).

About the Cover

Michael Dzado, ACØHB writes about his “Eight Channel Remote Control Antenna Selector.” With a single coaxial cable run to his shack, he is able to select between up to eight antennas. The Collins Amateur Radio Club uses a pair of the selectors to pick between several antennas and four radios. With better than 70 dB of port-to-port isolation he is sure the transmitted signal is going to the desired antenna!

In This Issue

Features

3 A Different Type of Software Defined Radio — SDR Based on Labview

Michael Knitter, DG5MK

8 An Eight Channel Remote Control Antenna Selector

Michael Dzado, ACØHB

18 Actual Measured Performance of Short, Loaded Antennas — Part 2

Barry A. Boothe, W9UCW

32 Radiation Resistance, Feed Point Impedance and Mythology

Robert J. Zavrel, Jr., W7SX

36 78 GHz LNA Wrap-Up

Tom Williams, WA1MBA
