About the Cover

Rubens Fernandes, VK5FE, built his own version of a Tricorder. His hand-held tool serves three important functions: it includes a 2 kHz to 500 MHz, –130 to +8 dBm RF generator, a 150 kHz to 500 MHz, –65 to +8 dBm power meter, and a 150 kHz to 500 MHz scalar network analyzer. A TFT touch screen provides input control and data display capabilities.
