About the Cover

John Stephensen, KD6OZH, built two versions of a clean stable VFO circuit that uses an Analog Devices ADF4157 fractional N PLL IC and an Atmel ATtiny2313 microcontroller. One version is a 390 to 425 MHz VHF/UHF VFO, and the other is a 75 to 150 MHz oscillator he built for a 3 to 16 MHz HF transceiver.

In This Issue
