About the Cover

John E. Post, KA5GSQ, taught an intense 4-day science and engineering summer camp program for high school students at Embry-Riddle Aeronautical University. The purpose of the camp was to motivate students to consider pursuing careers in science and engineering, specifically in electrical and computer engineering. It was also an opportunity to introduce the students to some basic Amateur Radio concepts. As part of the program, the students assembled a variety of temperature and pressure sensors, which they launched on a high-altitude balloon. On the cover, we see one of the APRS position-beacon trackers that they attached to the “balloon train.”

In This Issue

Features

3 A Surface Wave Transmission
 Glenn Elmore, N6GN, John Watrous, K6ZPB

10 A Simple Sensor Package for High Altitude Ballooning
 John E. Post, KA5GSQ

20 More Octave for L-Networks
 Maynard, A. Wright, W6PAP

24 A Closer Look at Vertical Antennas With Elevated Ground Systems — Part 2
 Rudy Severns, N6LF

34 IMD in FET and Diode Mixers at 70 cm
 John B. Stephensen, KD6OZH

40 SDR: Simplified
 Ray Mack, W5IFS

46 Upcoming Conferences

45 Letters to the Editor

48 Out of the Box
 Ray Mack, W5IFS
