

# STM Report Wisconsin Section

January 2020

*R-E-S-P-E-C-T*

FAQ # 222 How do I earn the respect of other operators? By giving it. Aretha Franklin was right. With respect to being respected, here's how to show respect and earn respect for yourself.

- 1) Respect your served agency. Treat their mission as worthy and important. Honor their protocol and decisions. Dress and act appropriately. Listen carefully and respond politely. Remember who's in charge. (Hint: It's not you.)
- 2) Respect the system. Don't by-pass steps (or nets) in handling messages because *you* think you have a better way. For example, the NTS uses all levels of the system (local, section, region, area, TCC) for training because all levels would be needed if we're deployed for a disaster. Follow established methods and practices for passing traffic.
- 3) Respect the net control. The net control is, simply, the boss. If the NCS says, "Net, Stand by" (or QNE) – everyone stands by. No comments. No questions. No whispering in the back of the room. Until the NCS starts again, the net is silent. If the NCS tells you, "Call NX9K and arrange to receive traffic," that's what you do. If the NCS says, "We're moving the net to 3.9845," everybody moves.
- 4) There is no such thing as the net control being "off frequency." Where the NCS is – **is** the net frequency. If you have something to add such as more traffic, a relay, or helpful information, get recognized (Say just your call) when the NCS stands by or asks for additional check-ins. Don't argue with the net control. You can discuss procedures privately after the net.
- 5) Respect the net itself and its purpose. Our section nets are a place for traffic handling and camaraderie. They're *NOT* the place for discussion of politics, religion, or public criticism.
- 6) Respect other operators. You don't know what challenges they face. You don't know about the noise, compromised location, time pressures, or the cat on the desk. Show your respect by your patience and understanding. With respect to corrections or suggestions, do it privately – preferably off the air. Be thoughtful. Be polite.
- 7) Respect the hobby. Ask before using a frequency. Don't run your power or audio unnecessarily high. Listen carefully to other stations. Do your best to be efficient and appreciate other operators' time and efforts.

Respectfully, K9LGU/STM
