

1999 ARRL September VHF QSO Party Results

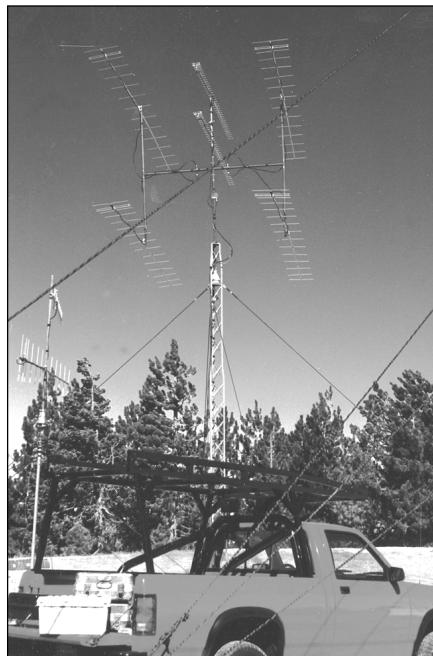

VHF/UHF

means a lot of different things to different people. Many hams immediately think of using their FM H-Ts or mobile radios to chat away on the local FM repeater driving to and from work. Packet will come to the minds of many who enjoy digital operating. And for chasing DX above 50 MHz, of course, it's hard to beat CW or SSB.

All it takes is a good contest to bring the best of VHF and UHF together—regardless of mode or location. You may be running FM contacts while perched on a mountaintop, or honing your rover skills with a friend while travelling 65 MPH down the interstate highway. You might test your SSB or CW QRP savvy after hiking to the top of a ridge behind your house, or you may choose to enjoy the mode of your choice from the comfort of your own shack. In whatever way you choose to compete, a VHF contest allows you to experience new opportunities in this wonderful avocation we call Amateur Radio.

The ARRL September VHF QSO Party netted 606 entries, with over 900 operators, including the operators at the various full and limited multi-operator stations. New to this annual fall VHF/UHF challenge was the inclusion of an Affiliated Club compe-

tition. Fourteen clubs entered the medium or local club categories for 1999, a number that is certain to rise in September 2000.

The multi-operator W6TOI group was well prepared on the West Coast and racked up a Top Ten finish in their category.

Jeff, W2FU, with Chris, K2CS, sharing the duties, set a new overall scoring mark for Rover entries with a score of 220,175. Their effort stands as the Atlantic Division record as well. They were joined as new rover division record setters by N4OFA in the Delta division, N1MJD in New England division, NK4Q in the Southeastern division, N6TEB in the Southwestern division and AB5SS in the West Gulf division.

Four new division records were established in the single-operator category. Congratulations to new record holders K1RZ in the Atlantic division, KA1ZE in the New England division, N9VM in the Pacific division and K5IUA in the West Gulf division. Rounding out single-op division record setters were KQ6QW and VE7DXG who set QRP portable marks in the Southwestern division and Canada respectively.

Multioperator and limited multioperator efforts were in abundance, and their operators accounted for approximately a third of the participation in the contest. The group efforts at K3MQH in the Atlantic division, N0UK in the Dakota division, K7VHF in the Northwestern division, and W6TOI in the Southwestern divisions all established new multioperator records for their divisions. New limited multioperator

records were established by the crew of N0QJM in the Dakota division and the N2NK effort in the Hudson division.

The year 2000 running of the September VHF QSO party will be held September 9–11. Now is the time to plan your participation. Remember, in order for your club to participate in an Affiliated Club Competition event, it must be up-to-date with its records and documentation with the ARRL. Also, we must receive a minimum of three entries from eligible club members attributing their points to your club's effort. Finally, don't let your club secretary forget that they must submit a list of all eligible members (not a general club roster) to the Contest Branch within 30 days after the end of the contest. It will be helpful to review

the rules for Affiliated Club competitions in the General Rules for All ARRL Contest, which is printed annually in the November issue of *QST*. They may also be found online at the Contest Branch home page at <http://www.arrl.org/contests>.

As announced in the January *QST*, the VHF/UHF/Microwave page on the ARRLWeb is an excellent resource for expanding your technical expertise as well as finding information about "What's Available" in this challenging operating arena. An electronic "field trip" to <http://www.arrl.org/tis/info/uhf-mw.html> might prove to be one of your most valuable assets as you expand your activities in the highest frequency ranges.

One more rule reminder: effective

January 1, 2000 there are now separate High and Low power categories for regular single operator stations. This will allow even tighter competition in what remains one of the more popular VHF/UHF operating events on the ARRL calendar.

The impact of license restructuring on VHF/UHF contesting is likely to be minimal. Except for the Novice licensee that has limited privileges on these bands, every licensed amateur can operate with full VHF and UHF privileges. By the time the second full weekend in September rolls around for the last ARRL VHF contest of the twentieth century, all licensed hams will have an opportunity to make the September VHF QSO party the "last great bash" of the VHF year. See you on the air that weekend!

Parked along the Skyline Drive, overlooking the beautiful Shenandoah Valley in Virginia, N1MD used his rover time not only to place second in the overall standings in the category, but also to enjoy some of the most magnificent scenery in the country.

Scores

Each line score lists call sign, score, stations worked, multipliers, number of grids activated (if Rover), and bands (A= 50 MHz, B = 144 MHz, C = 222 MHz, D = 432 MHz, 9 = 902 MHz, E = 1296 MHz, F = 2304 MHz, G = 3456 MHz, H = 5760 MHz, I = 10 GHz, J = 24 GHz, K = 47 GHz, L = 75 GHz, M = 119 GHz, N = 142 GHz, O = 241 GHz, P = 300+ GHz). Section band win indicators are listed in boldface type.
