About the Cover

Richard L. Quick, W4RQ, describes an easy to construct triangle loop antenna for use with horizontal polarization in the two-meter band. The loop radiation pattern is omnidirectional. This build is based on a 36-inch aluminum rule available at a hardware store. The loop fastens to a mast using a saddle clamp assembly. The omnidirectional pattern of the antenna has proven useful for a group of local hams who meet on the air in the SSB portion of the 2-meter band.

In This Issue

2 Perspectives

Kazimierz "Kai" Siwiak, KE4PT

3 Horizontally Polarized Two-Meter Triangle Loop Antenna

Richard L. Quick, W4RQ

5 New 2-m Winlink Gateway for Philadelphia Area Hams

Steven Davidson, K3FZT

12 Custom Front Panels with a Twist

Lynn Hansen, KU7Q

18 Diffraction of VHF and UHF Waves By a Window

Peter DeNeef, AE7PD

20 DSP CW Filter

Steve Geers, KA8BUW

25 An AI-Powered Transcription Bot for FM Transmissions

Brian Robert Callahan, AD2BA and Zhemin "Hisen" Zhang, KD2TAI
