

The American Radio Relay League

The American Radio Relay League, Inc., is a noncommercial association of radio amateurs, organized for the promotion of interest in Amateur Radio communication and experimentation, for the establishment of networks to provide communications in the event of disasters or other emergencies, for the advancement of the radio art and of the public welfare, for the representation of the radio amateur in legislative matters, and for the maintenance of fraternalism and a high standard of conduct.

ARRL is an incorporated association without capital stock chartered under the laws of the state of Connecticut, and is an exempt organization under Section 501(c)(3) of the Internal Revenue Code of 1986. Its affairs are governed by a Board of Directors, whose voting members are elected every three years by the general membership. The officers are elected or appointed by the Directors. The League is noncommercial, and no one who could gain financially from the shaping of its affairs is eligible for membership on its Board.

"Of, by, and for the radio amateur," ARRL numbers within its ranks the vast majority of active amateurs in the nation and has a proud history of achievement as the standard-bearer in amateur affairs.

A *bona fide* interest in Amateur Radio is the only essential qualification of membership; an Amateur Radio license is not a prerequisite, although full voting membership is granted only to licensed amateurs in the US.

Membership inquiries and general correspondence should be addressed to the administrative headquarters:

ARRL
225 Main St.
Newington, CT 06111 USA
Telephone: 860-594-0200
FAX: 860-594-0259 (24-hour direct line)

Officers

President: Rick Roderick, K5UR
P.O. Box 1463, Little Rock, AR 72203

The purpose of *QEX* is to:

- 1) provide a medium for the exchange of ideas and information among Amateur Radio experimenters,
- 2) document advanced technical work in the Amateur Radio field, and
- 3) support efforts to advance the state of the Amateur Radio art.

All correspondence concerning *QEX* should be addressed to the American Radio Relay League, 225 Main St., Newington, CT 06111 USA. Envelopes containing manuscripts and letters for publication in *QEX* should be marked Editor, *QEX*.

Both theoretical and practical technical articles are welcomed. Manuscripts should be submitted in word-processor format, if possible. We can redraw any figures as long as their content is clear. Photos should be glossy, color or black-and-white prints of at least the size they are to appear in *QEX* or high-resolution digital images (300 dots per inch or higher at the printed size). Further information for authors can be found on the Web at www.arrl.org/qex/ or by e-mail to qex@arrl.org.

Any opinions expressed in *QEX* are those of the authors, not necessarily those of the Editor or the League. While we strive to ensure all material is technically correct, authors are expected to defend their own assertions. Products mentioned are included for your information only; no endorsement is implied. Readers are cautioned to verify the availability of products before sending money to vendors.

Perspectives

Earth, Water, Air and Fire

The four classical elements embodied in their destructive form as earthquakes, floods, cyclones and wildfires have inundated the news as they wreak deadly havoc around the globe. We can add the aether as a fifth classical element that we interpret as radio waves and their propagation. Of the five elements, the manifestation of aether as radio wave propagation is the beneficial element, and the one to which we can directly relate.

One of the main tenets of amateur radio is that we help by providing disaster area communications at the front line for those in troubled areas. Specialized communicator knowledge and skills among radio amateurs about antennas, radios, modulations, and the standardization of communications protocols among emergency preparedness organization is widely recognized. This is a shout-out to all radio amateurs, and especially to *QEX* members, who have rendered their invaluable assistance in the emergency spots around the world.

QEX is a journal for communications experimenters. It is a disseminator of radio technologies and their advances. But in a larger sense it is a forum for communicators. Among the ranks of experimenters, authors and readers are a cadre of emergency radio communications volunteers, whom we salute.

In This Issue:

- Michael Reinhold, HB9BEP, and Martin Klaper, HB9ARK, use FT8 contacts to study ionospheric radio propagation.
- Jacek Pawlowski, SP3L, designs a wide-band end-fed wire antenna.
- Marcel De Canck, ON5AU, explains the use of *EZNEC Pro+ v.7.0* and *AutoEZ*.
- Dennis G. Sweeney, WA4LPR, describes phase noise measurements.
- Eric P. Nichols, KL7AJ, in his Essay #19 discusses the Smith Chart.

Writing for *QEX*

Please continue to send in full-length *QEX* articles, or share a **Technical Note** of several hundred words in length plus a figure or two. *QEX* is edited by Kazimierz "Kai" Siwiak, KE4PT, (kswiak@arrl.org) and is published bimonthly. *QEX* is a forum for the free exchange of ideas among communications experimenters. All members can access digital editions of all four ARRL magazines: *QST*, *OTA*, *QEX*, and *NCJ* as a member benefit. The *QEX printed edition* is available at an annual subscription rate (6 issues per year) for members and non-members, see www.arrl.org/qex.

Would you like to write for *QEX*? We pay \$50 per published page for full articles and *QEX* Technical Notes. Get more information and an Author Guide at www.arrl.org/qex-author-guide. If you prefer postal mail, send a business-size self-addressed, stamped (US postage) envelope to: *QEX* Author Guide, c/o Maty Weinberg, ARRL, 225 Main St., Newington, CT 06111.

Very kindest regards,
Kazimierz "Kai" Siwiak, KE4PT
